Manual on Civil Aviation Jet Fuel Supply International Civil Aviation Organization, 2012 **Sustainability in Global Companies** Samuel O. Idowu, Stephen Vertigans, 2025-03-26 This textbook focuses on how sustainability is practiced in companies in different sectors of the global economy examples include aviation banking energy financial services food manufacturing technology transportation and tourism These corporate sectors are at the forefront of the debate around

business and sustainability both in their usage of finite resources and their potential to deliver meaningful solutions. Consequently several experts were brought together for this book and asked to focus on how sustainability is understood and practiced in different companies around the globe in terms of the UN Sustainable Development Goals 2030. Chapters incorporate theoretical and applied examples that can help improve levels of insight into international business approaches. They provide opportunities to learn and disseminate factors that are delivering short medium and long term solutions and problems. These insights can incorporate the spectrum of activities required in order to achieve sustainability through industrial processes, supply chains to consumer behavior. The multi disciplinary nature of the fundamental issues also prompted a diverse selection of academics and practitioners across disciplines who have knowledge and/or experiences of sustainability and international business theories, practices and processes. Students and academics from across related disciplines, corporations, policymakers and members of societies who study or have an interest in sustainable development will particularly find this book useful.
