Building Blocks for Learning Occupational Therapy Approaches Jill Jenkinson, Tessa Hyde, Saffia Ahmad, 2008-11-20

Building Blocks for Learning Occupational Therapy Approaches is a resource book for educational staff and pediatric occupational therapists especially those new to the field. It shows how the implications of physical, psychological, social, and learning difficulties impact upon children's abilities. This highly practical book will help readers recognize when a student's poor performance within the classroom is a result of a medical condition or underlying motor and perceptual deficits.

Individuals in Context Virginia Griswold Fearing, Jo Clark, 2000. A significant challenge in occupational therapy practice today is to ensure that services are client centered, focused on occupation, and supported by research evidence. *Individuals in Context: A Practical Guide to Client Centered Practice*, edited by Virginia G. Fearing and Jo Clark, presents an integrated approach to practice. The Occupational Performance Process Model, which is the focus of the text, is an easy-to-use seven-stage guide to client-centered, evidence-based practice. Practical applications and sample case studies assist the reader in applying this approach in everyday practice. The book addresses challenges to practice and provides a self-evaluation tool for clients and therapists to reflect on achievements and barriers to client-centered practice. It weaves theory into practice in a refreshing and understandable way. This gem of a book is a collaborative effort by clients, clinicians, academics, and administrators who present a practical approach to client-centered practice in language that is accessible to busy therapists and students. *Individuals in Context* is a response to clients, therapists, and student therapists who are seeking ways to think about the occupational therapy process. It provides students and therapists at any stage in their career with an opportunity to reflect on their personal practice to ensure that it focuses on client's needs, is based on sound theory centered on occupation, and continually evaluates the outcome of therapy intervention. Each chapter reflects the voices, values, and contexts of its authors, and this diversity has been intentionally preserved. It is a multifaceted choir supporting occupational therapy students and therapists in everyday practice.
