The Novel and the Sea Margaret Cohen, 2021-06-08 For a century the history of the novel has been written in terms of nations and territories the English novel the French novel the American novel But what if novels were viewed in terms of the seas that unite these different lands Examining works across two centuries *The Novel and the Sea* recounts the novel's rise told from the perspective of the ship's deck and the allure of the oceans in the modern cultural imagination Margaret Cohen moors the novel to overseas exploration and work at sea framing its emergence as a transatlantic history steeped in the adventures and risks of the maritime frontier Cohen explores how Robinson Crusoe competed with the best selling nautical literature of the time by dramatizing remarkable conditions from the wonders of unknown lands to storms shipwrecks and pirates She considers James Fenimore Cooper's refashioning of the adventure novel in postcolonial America and a change in literary poetics toward new frontiers and to the maritime labor and technology of the nineteenth century Cohen shows how Jules Verne reworked adventures at sea into science fiction how Melville Hugo and Conrad navigated the foggy waters of language and thought and how detective and spy fiction built on sea fiction's problem solving devices She also discusses the transformation of the ocean from a theater of skilled work to an environment of pristine nature and the sublime A significant literary history *The Novel and the Sea* challenges readers to rethink their land locked assumptions about the novel

The Travelers' World Harry LIEBERSOHN, Harry Liebersohn, 2009-06-30 In a beautifully crafted narrative that transports the reader from the salons of Europe to the shores of Tahiti Harry Liebersohn examines the transformation of global knowledge during the great age of scientific exploration He moves beyond the traditional focus on British and French travelers to include Germans Russians and some Americans as well as the Tahitian Hawaiian and other Pacific islanders they encountered Germany gets special attention because its travelers epitomized the era's cosmopolitanism and its philosophers engaged most fully in a multicultural understanding of humanity Famous adventurers like Captain Cook make appearances but it's the observations of such naturalists as Philibert Commerson George Forster and Adelbert von Chamisso that helped most to generate a new understanding of these far flung societies These European travelers saw non Europeans neither as savages nor as projections of colonial fantasies Instead the explorers accumulated a rich storehouse of perceptions through negotiations with patrons at home collaborators abroad salon philosophers and missionary rivals Liebersohn illuminates the transformative nature of human connections He examines the expectations these servants of empire brought to the peoples they encountered and acknowledges the effects of Oceanian behaviors including unexpected notions of sexuality on the Europeans Equally important he details the reception of these travelers upon their return home An unforgettable voyage filled with delightful characters dramatic encounters and

rich cultural details The Travelers World heralds a moment of intellectual preparation for the modern global era We now travel effortlessly to distant places but the questions about perception truth and knowledge that these intercontinental mediators faced still resonate Intimate Strangers Vanessa Smith,2010-10-28 A fascinating study of the importance of ideas of friendship in late eighteenth century explorations of the Pacific **Romantic Literature, Race, and Colonial Encounter** P. Kitson,2016-04-30 In a fresh investigation of primary sources and original readings Kitson traces the origins of contemporary ideas about race through a variety of late Eighteenth and early Nineteenth century literary texts by Coleridge Byron Shelley De Quincey and other published and unpublished writings about travel and exploration and natural history Histories of Science David Alf,Danielle Spratt,2025-06-30 Spreading the news of scientific breakthroughs in the eighteenth century Histories of Science shows how different forms of media communicated scientific breakthroughs during the long eighteenth century bringing together eighteen humanities scholars to discuss the representation reception and application of natural philosophy in the Atlantic world In particular the authors focus on descriptions of scientific discoveries in popular print with essays on topics as varied as placebo pills irrigation systems and navigational technology And while each contributor advances a discrete argument the collection coheres in its shared questions of methodology historicity and ethics Histories of Science expands our record of the past our understanding of the present and our ability to imagine the future *Pacific Gateways: Trans-Oceanic Narratives and Anglophone Literature, 1780-1914* Tomoe Kumojima,Laurence Williams,2024-12-28 Who is the Proust of the Paphuans Saul Bellow famously inquired as if this vast expanse were too small scattered and backward to deserve consideration In response to this challenge Pacific Gateways seeks to define a new if provisional canon This diverse insightful and compelling collection applies ethnographic perspectives contact zone participant testimony indigeneity to a diverse range of genres romance travelogue memoir to demonstrate how the Pacific already prefigures and generates later networks of global exchange It offers not retrospect into a distant past but intimations of possible futures as a portal into alternative forms of planetary consciousness Steve Clark This book explores the entanglements of Anglophone literature with Pacific geographies histories and cultures during the long nineteenth century giving a transpacific context to Victorian writers including Dickens Kingston Stevenson and Trollope and setting them alongside Pacific Rim writers such as Bret Harte Lafcadio Hearn Joseph Heco and Yei Theodora Ozaki The chapters focus upon the physical and imaginative gateways produced by Western technology including the port city the steamship telegraph lines and the networks of international trade and finance These Pacific gateways shape the development of a transpacific consciousness in Anglophone literature whose modes of exchange and patterns of thought can still be seen in modern day attitudes to the region The book aims to present a polyglot and cross cultural history of Anglophone literature in the Pacific in which Anglo American imperialism coexists with established intra Asian networks Chapter 1 is available open access under a Creative Commons Attribution 4.0 International License via link [springer.com](https://www.springer.com)
