Quarks Chaos Christianity Questions To Science And Religion:

Quarks, Chaos & Christianity J. C. Polkinghorne, 1996 In a crystal clear discussion of science and religion and their logical friendship in the search for truth and understanding Polkinghorne draws on discoveries made in atomic physics to make credible the claims of Christianity and helps refine Christian perceptions through the knowledge that the new science brings He discusses belief in God chaos evolution miracles and prayer and gives an answer to the question Can a scientist believe

FaithQuestions - What About Religion and Science? Paul E. Stroble, 2010-09-01 This book invites us to consider ways to remain confident in our faith as we understand and appreciate the discoveries and advances of science How can Christians integrate believe or accept all the teachings of science the Bible and Christian tradition How can we believe in both the discoveries of science and the Bible Are science and religion compatible or incompatible Does the Christian understanding that God created the universe exclude the findings and discoveries of science What is the role of faith in the world of education What can we believe about intelligent design If we believe in evolution can we believe in God Does the Big Bang theory exclude God If we are Christians can we support stem cell research and cloning Can science help us understand the afterlife Does science negate or support prayer What is the difference between faith and reason Do they exclude or complement one another As Paul Stroble addresses these questions and others he helps us examine different possible ways that religion and science relate to each other and ways that science and religion provide meaning and value in our lives PAUL STROBLE is an elder of the Illinois Great Rivers Conference of The United Methodist Church He has served both as parish pastor and college instructor and currently teaches at the University of Akron where he earned an Excellence in Teaching award He is a long time writer researcher for the United Methodist curriculum FaithLink and author of numerous articles and curricular materials Among his eleven books are Paul and the Galatians and What Do Other Faiths Believe He is married to Dr Beth Stroble and they have a daughter Emily The FaithQuestions study series is designed to meet the needs of people who have questions about the Christian faith and who desire a deeper engagement with scripture and with discipleship as they explore studies of issues in theology ethics missions Bible interpretation and church history It seeks to equip a new generation of church leaders to appreciate the eternal message of the gospel and to develop the skills to articulate its relevance in our contemporary context The series would be a good choice for users who have completed Disciple this will be the ninth study in the series following What About the Rapture What Do Other Faiths Believe What Happens When We Die What About Divine Healing What About the Trinity What About Forgiveness What About the Devil What About Reading the Bible

Faith in the Living God, 2nd Edition John Polkinghorne, Michael Welker, 2019-04-12 In this book John Polkinghorne and Michael Welker explain how they understand faith in the living God Between them they offer a binocular vision from their twin perspectives to yield helpful insight in relation to the important issues Part of the fascination of this book is how two people with such different backgrounds approach central theological questions relating to the faith they

both share Their concerns are truth rather than polemics reliability rather than simple certainty They seek to anchor their thought in concrete particulars rather than abstract generalizations They ask the questions that trouble the inquiring mind and meet head on the challenge as well as the reassurances of belief This second edition provides a new Preface and updated bibliographies

God and the History of the Universe Jarvis Streeter, 2016-03-22 The popular belief that a scientific understanding of reality is incompatible with a Christian one is simply wrong Some Christian understandings of reality do conflict with some scientific understandings But a thoroughly rational Christian understanding of the origin and history of the universe will be informed by the best scientific theories and the facts founded on them This book weaves a narrative of the origin and history of the universe from the perspective of contemporary science with a Christian understanding of God and of God's role in the origin and history of the universe At the center of this integrated narrative is the view that God who is pure unbounded Love is Creator the zest for life in the universe comes from God and God is the source of Truth Beauty and Goodness in the universe God is amazed and delighted at what God and the world has created God is saddened by ways creatures have fallen short of pure unbounded Love Truth Beauty and Goodness and God's pure unbounded Love keeps on trying to persuade all creatures toward Truth Beauty and Goodness

Christlikeness Robert P. Vande Kappelle, 2022-12-20 Human beings are happiest when they live virtuously For Jesus and his first followers living virtuously meant loving God and others as extensions of oneself However what began as an inclusive ethical way of life based on unconditional love gradually degenerated into an exclusive social and political religious movement that came to be known as Christendom Originally a continuation of Jewish messianism the Christian movement aligned itself with Platonic and Aristotelian elements comprising a marriage of specific elements of Greek philosophy with Roman imperialism What if instead of aligning with the dualist idealist exclusivist and supremacist Socratic movement perpetuated by Plato and his followers ancient Christians had aligned with the nondualist realist inclusivist and egalitarian Stoic movement spread by Zeno and his followers an ethical tradition that like the teachings of Jesus was guided by providential and natural law ethics The results of such a synthesis laid out in this innovative study are practical inspiring and transformative for they are based on the greatest vision possible for humanity a nondualist approach to life that counters authoritarian and exclusivist behavior fostered by supremacist political ethical and social religious ideologies Unlike Christendom based on ecclesiastical triumphalism the way of Christlikeness envisioned by Jesus for humanity is grounded in humility compassion service and love of others
