The Idea of Semitic Monotheism Guy G. Stroumsa, 2021 The Idea of Semitic Monotheism examines some major aspects of the scholarly study of religion in the long nineteenth century from the Enlightenment to the First World War It aims to understand the new status of Judaism and Islam in the formative period of the new discipline Guy G Stroumsa focuses on the concept of Semitic monotheism a concept developed by Ernest Renan around the mid nineteenth century on the basis of the postulated and highly problematic contradistinction between Aryan and Semitic families of peoples cultures and religions This contradistinction grew from the Western discovery of Sanskrit and its relationship with European languages at the time of the Enlightenment and Romanticism Together with the rise of scholarly Orientalism this discovery offered new perspectives on the East as a consequence of which the Near East was demoted from its traditional status as the locus of the Biblical revelations This innovative work studies a central issue in the modern study of religion Doing so however it emphasizes the new dualistic taxonomy of religions had major consequences and sheds new light on the roots of European attitudes to Jews and Muslims in the twentieth century up to the present day

Revisiting the Historiography of Postwar Avant-Garde Music Anne-Sylvie Barthel-Calvet, Christopher Brent Murray, 2022-07-29 This collection of essays delves into the historiographical traditions that have dominated how the stories of European postwar avant garde music are told seeking to approach commonplaces of that history writing from new perspectives The contributors revisit subjects as varied as the impact of long playing records on the emergence of open works Messiaen s interest in non European musical traditions Xenakis s turn to information theory Kagel s strategic invention of a new genre Berio s dependence on funding from American foundations and the ways in which figures like Boulez Stockhausen Pousseur and Nono constructed their musical ancestries Leading experts in their respective fields the volume s authors have sought to rethink the historiography of European experimental music of the 1950s 1960s and 1970s in ways that resituate that small but influential milieu in broader historical and cultural contexts In doing so they suggest new directions and insights for

students and specialists of twentieth century music and music historiography **Leaves of Faith** Aharon Lichtenstein, 2003

Where its predecessor dwelt primarily upon the content mode and practitioners of Torah study this volume focuses upon issues some theoretical others pragmatic some current others timeless which concern the practice and implementation of Torah It opens with an inquiry into whether and to what extent Halakhah recognizes the validity and value of an ethic which in some sense lies beyond its scope This is followed by two essays focused upon events in Israel but of more general significance as well which deal with the character and bounds of Jewish polity Tangentially related is the subject of the next chapter straddling the communal and the personal regarding the parameters of tolerance The next several chapters treat more purely personal topics response to suffering Shabbat prayer and shemittah They are followed by discussions of aspects of the sensitive areas of conversion abortion and the Israeli chief rabbinate commingled with two essays more sociologically oriented on Jewish self identification and communal service and an exchange concerning Baruch Goldstein These are in turn followed by two chapters focused upon modern or centrist Orthodoxy particularly The volume concludes with a series of responses to major questions posed in various symposia in which participants were asked descriptively and prescriptively both to evaluate the current Jewish scene and to chart a suggested course for its future direction Political Construction Sites Pal Kolsto, 2018-02-19

The dissolution of the Soviet Union has provided scholars with tremendously rich material for the study of comparative nation building Not since the decolonization of Africa in the 1960s have so many new states been established in one stroke in one region The post Soviet states moreover have all the necessary prerequisites for fruitful comparison a number of similarities but also significant differences in terms of size culture and recent history In order to survive in the long run modern states normally must have a population that possesses some sense of unity Its citizens must adhere to some common values and common allegiance towards the same state institutions and symbols This does not mean that all inhabitants must necessarily share the same culture but they should at least regard themselves as members of the same nation Strategies to foster this kind of common nationhood in a population are usually referred to as nation building After a decade of post Soviet nation building certain patterns are emerging and not always the most obvious ones Some states seem to manage well against high odds while others appear to be disintegrating or sinking slowly into oblivion To a remarkable degree the former Soviet republics have chosen different models for their nation building This book examines the preconditions for these endeavors the goals the state leaders are aiming at and the means they employ to reach them **To Die For** Cecilia Elizabeth O'Leary, 2018-06-05

July Fourth The Star Spangled Banner Memorial Day and the pledge of allegiance are typically thought of as timeless and consensual representations of a national American culture In fact as Cecilia O'Leary shows most trappings of the nation's icons were modern inventions that were deeply and bitterly contested While the Civil War determined the survival of the Union what it meant to be a loyal American remained an open question as the struggle to make a nation moved off of the battlefields and into cultural and political terrain Drawing upon a wide variety

of original sources O Leary's interdisciplinary study explores the conflict over what events and icons would be inscribed into national memory what traditions would be invented to establish continuity with a suitable past who would be exemplified as national heroes and whether ethnic regional and other identities could coexist with loyalty to the nation This book traces the origins development and consolidation of patriotic cultures in the United States from the latter half of the nineteenth century up to World War I a period in which the country emerged as a modern nation state Until patriotism became a government dominated affair in the twentieth century culture wars raged throughout civil society over who had the authority to speak for the nation Black Americans women's organizations workers immigrants and activists all spoke out and deeply influenced America's public life Not until World War I when the government joined forces with right wing organizations and vigilante groups did a racially exclusive culturally conformist militaristic patriotism finally triumph albeit temporarily over more progressive egalitarian visions As O Leary suggests the paradox of American patriotism remains with us Are nationalism and democratic forms of citizenship compatible What binds a nation so divided by regions languages ethnicity racism gender and class The most thought provoking question of this complex book is Who gets to claim the American flag and determine the meanings of the republic for which it stands

Jesus and the Rise of Nationalism Halvor Moxnes, 2011-10-30 The great German theologian Albert Schweitzer famously drew a line under nineteenth century historical Jesus research by showing that at the bottom of the well lay not the face of Joseph's son but rather the features of all the New Testament scholars who had tried to reveal his elusive essence In his thoughtful and provocative new book Halvor Moxnes takes Schweitzer's observation much further the doomed quest for the historical Jesus was determined not only by the different personalities of the seekers who undertook it but also by the social cultural and political agendas of the countries from which their presentations emerged Thus Friedrich Schleiermacher's Jesus was a teacher corresponding with the role German teachers played in Germany's movement for democratic socialism Ernst Renan's Jesus was by contrast an attempt to represent the positive Orient as a precursor to the civilized self of his own French society Scottish theologian G A Smith demonstrated in his manly portrayal of Jesus a distinctively British liberalism and Victorian moralism Moxnes argues that one cannot understand any life of Jesus apart from nationalism and national identity and that what is needed in modern biblical studies is an awareness of all the presuppositions that underlie presentations of Jesus whether in terms of power gender sex and class Only then he says can we start to look at Jesus in a way that does him justice

Defensive Nationalism B. S. Rabinowitz, 2023-05-09 In *Defensive Nationalism* B S Rabinowitz looks at the rise of nativism and populism today by using the works of two great theoreticians Karl Polanyi and Joseph Schumpeter She combines Polanyi's concept of the double movement away from markets and toward social protection with Schumpeter's theory of innovation Rabinowitz argues turn of the century transportation and communications revolutions in both eras produced toxic political upheavals and reframes nationalism as a three part process creative consolidating and defensive Skillfully combining theory and history the author

produces a stunningly comprehensive account of why populism and fascism are on the rise in the early 21st century The Black and White Rainbow Carolyn Holmes, 2020-10-13 Nation building imperatives compel citizens to focus on what makes them similar and what binds them together forgetting what makes them different Democratic institution building on the other hand requires fostering opposition through conducting multiparty elections and encouraging debate Leaders of democratic factions like parties or interest groups can consolidate their power by emphasizing difference But when held in tension these two impulses toward remembering difference and forgetting it between focusing on unity and encouraging division are mutually constitutive of sustainable democracy Based on ethnographic and interview based fieldwork conducted in 2012 13 The Black and White Rainbow Reconciliation Opposition and Nation Building in Democratic South Africa explores various themes of nation and democracy building including the emotional and banal content of symbols of the post apartheid state the ways that gender and race condition nascent nationalism the public performance of nationalism and other group based identities integration and sharing of space language diversity and the role of democratic functioning including party politics and modes of opposition Each of these thematic chapters aims to explicate a feature of the multifaceted nature of identity building and link the South African case to broader literatures on both nationalism and democracy **The Great Experiment** Strobe Talbott, 2009-03-17 Acclaimed journalist Talbott tells the story of humankind's struggle to band together for protection and profit and the urgent need for a new birth of American leadership to meet the looming threats of terror climate change and nuclear catastrophe
