Question Bridge Black Males In America:

Question Bridge Deborah Willis, Natasha L. Logan, 2015 *Question Bridge* assembles a series of questions posed to black men by and for other black men along with the corresponding responses and portraits of the participants. The questions range from the comic to the sublimely philosophical from Am I the only one who has problems eating chicken watermelon and bananas in front of white people to Why is it so difficult for black American men in this culture to be themselves their essential selves and remain who they truly are. The answers tackle the issues that continue to surround black male identity today in a uniquely honest no holds barred manner. While the ostensible subject is black men the conversation that evolves in these pages is ultimately about the nature of living in a post Obama post Ferguson post Voting Rights Act America. *Question Bridge* is about who we are and what we mean to one another. Most critically it asks how can we start to dismantle the myths and misconceptions that have evolved around race and gender in America and how can we reset the narrative about ourselves just as blacklivesmatter has reset the narrative of civil protest. *Question Bridge Black Males* was originally created by Chris Johnson in 1996 the project was revived by Hank Willis Thomas Kamal Sinclair and Bayet Ross Smith who filmed over 150 black men in nine American cities. This content was used to create a five screen video installation that has been exhibited at over thirty five institutions including the Brooklyn Museum Oakland Museum of California Birmingham Museum of Art Cleveland Museum of Art Milwaukee Art Museum California African American Museum Los Angeles DuSable Museum of African American History Chicago Exploratorium San Francisco Missouri History Museum St Louis Harvey B Gantt Center for African American Arts Culture Charlotte NC Corcoran Gallery of Art Washington DC Schomburg Center for Research in Black Culture New York and New Frontier exhibition at Sundance Film Festival Park City Utah. The *Question Bridge* Project includes various platforms an interactive website and mobile app as well as community roundtable conversations and a curriculum designed for high school learners. The founding artists along with contributions from Ambassador Andrew Young Jesse Williams Rashid Shabazz and Delroy Lindo will introduce and contextualize the body of the work and provide closing remarks on our current and future social climate.

I-Docs Judith Aston, Sandra Gaudenzi, Mandy Rose, 2017-02-28 The history of documentary has been one of adaptation and change as documentarists have harnessed the affordances of emerging technology. In the last decade interactive documentaries i docs have become established as a new field of practice within non fiction storytelling. Their various incarnations are now a focus at leading film festivals IDFA DocLab Tribeca Storyscapes Sheffield DocFest major international awards have been won and they are increasingly the subject of academic study. This anthology looks at the creative practices purposes and ethics that lie behind these emergent forms. Expert contributions case studies and interviews with major figures in the field address the production processes that lie behind interactive documentary as well as the political cultural and geographic contexts in which they are emerging and the media ecology that supports them. Taking a broad view of interactive documentary as any work which engages with the real by

employing digital interactive technology this volume addresses a range of platforms and environments from web docs and virtual reality to mobile media and live performance It thus explores the challenges that face interactive documentary practitioners and scholars and proposes new ways of producing and engaging with interactive factual content Collective Wisdom Katerina Cizek, William Uricchio, 2022-11-01 How to co create and why the emergence of media co creation as a concept and as a practice grounded in equity and justice Co creation is everywhere It s how the internet was built it generated massive prehistoric rock carvings it powered the development of vaccines for COVID 19 in record time Co creation offers alternatives to the idea of the solitary author privileged by top down media But co creation is easy to miss as individuals often take credit for and profit from collective forms of authorship erasing whole cultures and narratives as they do so Collective Wisdom offers the first guide to co creation as a concept and as a practice tracing co creation in a media making that ranges from collaborative journalism to human AI partnerships Why co create and why now The many coauthors drawing on a remarkable array of professional and personal experience focus on the radical sustained practices of co creating media within communities and with social movements They explore the urgent need for co creation across disciplines and organization and the latest methods for collaborating with nonhuman systems in biology and technology The idea of collective intelligence is not new and has been applied to such disparate phenomena as decision making by consensus and hived insects Collective wisdom goes further With conceptual explanation and practical examples this book shows that co creation only becomes wise when it is grounded in equity and justice With Coauthors Juanita Anderson Maria Agui Carter Detroit Narrative Agency Thomas Allen Harris Maori Karmael Holmes Richard Lachman Louis Massiah Cara Mertes Sara Rafsky Mich le Stephenson Amelia Winger Bearskin and Sarah Wolozin **Seeing Others** Michèle Lamont, 2025-01-07 A thoughtful recipe for building social justice Kirkus Reviews from acclaimed Harvard sociologist Mich le Lamont that makes the case for reexamining what we value the quest for respect in an age that has been defined by growing inequality and the obsolescence of the American dream In this capstone work Mich le Lamont unpacks the power of recognition rendering others as visible and valued by drawing on nearly forty years of research and new interviews with young adults and cultural icons from Nikole Hannah Jones and Cornel West to Michael Schur and Roxane Gay Decades of neoliberalism have negatively impacted our sense of self worth up and down the income ladder just as the American dream has become out of reach for most people By prioritizing material and professional success we judge ourselves and others in terms of self reliance competition and diplomas The foregrounding of these attributes of the upper middle class in our values system feeds into the marginalization of workers people of color LGBTQIA individuals and minority groups The solution Lamont argues is to shift our focus towards what we have in common while actively working to recognize the diverse ways one can live a life Building on Lamont s lifetime of expertise and revelatory connections between broad ranging issues Seeing Others delivers realistic sources of hope by reducing stigma we put change within reach Just as Robert Putnam s Bowling Alone did for a previous

generation Seeing Others strikes at the heart of our modern struggles and illuminates an inclusive path forward with new ways for understanding our world **Human Rights in Language and STEM Education** Zehlia

Babaci-Wilhite, 2016-03-22 This volume explores the challenges of teaching and learning Science Technology Engineering and Mathematics STEM subjects in local languages and local contexts in a range of countries around the world Many countries around the world including African countries have been largely excluded from the transformation that is going on in STEM pedagogy in the USA where the emphasis is on the importance of language choice and the development of English Language Learner ELL STEM subjects in many parts of the world have been taught in a global language mainly English rather than using a local language and local curriculum This creates pedagogical challenges to the teaching of STEM The contributions to this book review evidence and arguments for the teaching of STEM subjects in local languages and several chapters make this case that this should be considered a human right both in national educational programs and in development aid Working across disciplines and domains has the potential to lead to new understanding and the removal of barriers to progress with the ultimate goal of creating solutions to persistent problems in education Cross disciplinary work in science language and literacy has shown much promise and demonstrated the importance of developing language along with disciplinary knowledge This volume provides a deep dive into this topic with articles by several scholars in the field of language in STEM Jaqueline Barber Director of the Learning Design Group at the Lawrence Hall of Science University of California Berkeley USA In an increasingly technological world STEM Education has become a priority on national agendas and in educational institutions Meaningful access to STEM education can enable or hinder young people from gaining entry into the world of work It is against this backdrop that the edited collection Human Rights and Language in STEM Education needs to be welcomed The various chapters tackle the big questions of access and many others This edited collection is required reading for all those working in STEM and for policy makers who tend to see language and STEM as binaries rather than as interdependent Zubeida Desai Professor and Dean of Education University of the Western Cape South Africa This volume by researchers from 10 countries provides a thought and action provoking multidimensional analysis of issues on the dignity of the use of STEM subjects in local education in the perspective of human rights This book is especially recommended to researchers and education policy makers in such areas as STEM Educational Theory and Praxis Human Rights Future sustainable Development Science and Technology Literacy May it inspire similar volumes in today's politically ebullient world Francisco Gomes de Matos Professor Emeritus of Linguistics human linguistic rights scholar Federal University of Pernambuco Recife Brazil *Art as Social Practice* xtine burrough, Judy Walgren, 2022-03-07 With a focus on socially engaged art practices in the twenty first century this book explores how artists use their creative practices to raise consciousness form communities create change and bring forth social impact through new technologies and digital practices Suzanne Lacy's Foreword and section introduction authors Anne Balsamo Harrell Fletcher Natalie Loveless Karen Moss and

Interactive Documentary Kate Nash, 2021-07-19 Tracing continuities in digital and documentary practices this book is a study of interactive documentary from the perspective of documentary culture Exploring the dizzying array of new documentary forms that have emerged in the past ten years the book is grounded in the analysis of multiple recent examples of digital documentary work drawing out the key issues that the work raises These issues provide a starting point for theoretical reflection with each chapter developing concepts and frameworks to facilitate thinking with and through interactive documentary The book explores questions of polyvocality participation and political voice as well as the sociality and performativity of digital documentary practice By thinking deeply and critically about interactive documentary practice the book charts the many and various ways in which interactive documentaries claim the real contingently partially or in some cases collectively Each chapter draws on a range of examples from digital games to data visualisations database documentaries to virtual reality demonstrating how we might engage with these unstable digital texts The book will be particularly valuable for students and researchers keen to make connections between documentary and digital media scholarship

Treating Violence Rob Gore, 2024-05-07 The inspiring story of a Black doctor who was deeply affected by the violence that plagued his Brooklyn childhood and later dedicated himself to addressing trauma and violence as public health issues Rob Gore first encountered violence when he was beaten and robbed as a 10 year old it was treated as an inevitable fact of life but after another brush with violence as a teen he began to reject that prevalent attitude As he matured and became a doctor he grew in his determination to find treatments for what he saw not as an unavoidable fact for most people living in vulnerable underserved neighborhoods especially but as a public health issue that could be addressed by early intervention and solid support beginning in the medical community He also became deeply involved in efforts to diversify the entire field of medicine starting with the front lines in the Emergency Department Seeing his brother Angel and close friend Willis fall prey to the epidemic of violence with profound and in Willis s case deadly consequences Rob began seriously researching the issue and went on to found an organization which is one of the models for successful approaches to reducing

violence and protecting victims who are disproportionately BIPOC living in impoverished neighborhoods or members of the LGBTQ community Here he provides not only statistics but stories of what he witnessed in NYC neighborhoods in Atlanta Chicago Buffalo and even in medical work in Haiti and Kenya His work with the Kings Against Violence Initiative KAVI and allied organizations is a blueprint for treating violence not as a police matter but as a public health crisis which can and should be addressed and substantially reduced The people he introduces us to in these pages are not merely victims but often advocates paving the way for eliminating the epidemic of violence in our country The Art Museum Redefined Johanna K. Taylor, 2019-10-04 This book presents a critical analysis of the power and opportunity created in the implementation of community engaged practices within art museums by looking at the networks connecting art museums to community organizations artists and residents The Art Museum Redefined places the interaction of art museums and urban neighbourhoods as the central focus of the study to investigate how museums and artists collaborate with residents and local community groups Rather than defining the community solely from the perspective of a museum looking out at its audience the research examines the larger networks of art organizing and creative activism connected to the museum that are active across the neighbourhood Taylor's research encompasses the grassroots efforts of local groups and their collaboration with museums and other art institutions that are extending their reach outside their physical walls and into the community This focus on social engagement speaks to recent emphasis in cultural policy on cultural equity and inclusion creative place making and community engagement at neighbourhood and city levels and will be of interest to students scholars and policy makers alike

Chokehold Paul Butler, 2018-09-18 Finalist for the 2018 National Council on Crime Delinquency's Media for a Just Society Awards Nominated for the 49th NAACP Image Award for Outstanding Literary Work Nonfiction A 2017 Washington Post Notable Book A Kirkus Best Book of 2017 Butler has hit his stride This is a meditation a sonnet a legal brief a poetry slam and a dissertation that represents the full bloom of his early thesis The justice system does not work for blacks particularly black men The Washington Post The most readable and provocative account of the consequences of the war on drugs since Michelle Alexander's *The New Jim Crow* The New York Times Book Review Powerful deeply informed from a legal standpoint and yet in some ways still highly personal The Times Literary Supplement London With the eloquence of Ta Nehisi Coates and the persuasive research of Michelle Alexander a former federal prosecutor explains how the system really works and how to disrupt it Cops politicians and ordinary people are afraid of black men The result is the Chokehold laws and practices that treat every African American man like a thug In this explosive new book an African American former federal prosecutor shows that the system is working exactly the way it's supposed to Black men are always under watch and police violence is widespread all with the support of judges and politicians In his no holds barred style Butler whose scholarship has been featured on 60 Minutes uses new data to demonstrate that white men commit the majority of violent crime in the United States For example a white woman is ten times more likely to be raped by a white male acquaintance

than be the victim of a violent crime perpetrated by a black man Butler also frankly discusses the problem of black on black violence and how to keep communities safer without relying as much on police Chokehold powerfully demonstrates why current efforts to reform law enforcement will not create lasting change Butler s controversial recommendations about how to crash the system and when it s better for a black man to plead guilty even if he s innocent are sure to be game changers in the national debate about policing criminal justice and race relations
