Semantics Culture And Cognition Universal Human Concepts In Culture Specific Configurations:

Semantics, Culture, and Cognition Anna Wierzbicka, 1992 This study ranges across a wide variety of languages and cultures in an attempt to identify concepts which are truly universal and to explore whether certain words are culture specific Semantics, Culture, and Cognition, 1992 **Semantics, Culture and Cognition** Anna Wierzbicka, 1992

Semantics : Primes and Universals Anna Wierzbicka, 1996-03-28 This book provides a synthesis of Wierzbicka's theory of meaning which is based on conceptual primitives and semantic universals using empirical findings from a wide range of languages While addressed primarily to linguists the book deals with highly topical and controversial issues of central importance to several disciplines including anthropology psychology and philosophy Conceptual primitives and semantic universals are the cornerstones of a semantic theory which Anna Wierzbicka has been developing for many years *Semantics Primes and Universals* is a major synthesis of her work presenting a full and systematic exposition of that theory in a non technical and readable way It delineates a full set of universal concepts as they have emerged from large scale investigations across a wide range of languages undertaken by the author and her colleagues On the basis of empirical cross linguistic studies it vindicates the old notion of the psychic unity of mankind while at the same time offering a framework for the rigorous description of different languages and cultures A major synthesis of Anna Wierzbicka's work Relative Points of View Magda Stroinska, 2001 The relationship between language and various kinds of non linguistic behavior has been of great fascination for many of those working in the fields of cultural anthropology linguistics and philosophy or broadly understood cultural studies The authors in this volume explore this relationship in a number of cultures and social contexts and discuss the problem of linguistic relativism and its application to several areas of social interaction across cultures The authors deal with such questions as how language and culture intersect resulting in different points of view on reality that are all equally authentic and rooted in experience The question of the influence of language and culture on our perception of physical and social reality is re examined for such domains as politics commerce working with people religion and gender relations **Cross-Linguistic Semantics** Cliff Goddard, 2008-04-10 Cross linguistic semantics investigating how languages package and express meanings differently is central to the linguistic quest to understand the nature of human language This set of studies explores and demonstrates cross linguistic semantics as practised in the natural semantic metalanguage NSM framework originated by Anna Wierzbicka The opening chapters give a state of the art overview of the NSM model propose several theoretical innovations and advance a number of original analyses in connection with names and naming clefts and other specificational sentences and discourse anaphora Subsequent chapters describe and analyse diverse phenomena in ten languages from multiple families geographical locations and cultural settings around the globe Three substantial studies document how the metalanguage of NSM semantic primes can be realised in languages of widely differing types Amharic Ethiopia Korean and East Cree Each constitutes a lexicogrammatical portrait in miniature of the language concerned Other

chapters probe topics such as inalienable possession in Koromu Papua New Guinea epistemic verbs in Swedish hyperpolysemy in Bunuba Australia the expression of momentariness in Berber ethnogeometry in Makasai East Timor value concepts in Russian and virtuous emotions in Japanese This book will be valuable for linguists working on language description lexical semantics or the semantics of grammar for advanced students of linguistics and for others interested in language universals and language diversity **Semantics, Culture, and Cognition** Anna Wierzbicka, 2023 This study ranges across a wide variety of languages and cultures in an attempt to identify concepts which are truly universal and to explore whether certain words are culture specific Concepts, Discourses, and Translations Barbara Lewandowska-Tomaszczyk, Marcin Trojszczak, 2022-06-06 This present book discusses issues related to languages cultures and discourses by addressing a variety of topics ranging from culture and translation cognitive and linguistic dimensions of discourse and the role of language in political discourses and bilingualism By focusing on multiple interconnected research subjects the book allows us to see the intersections of language culture and discourse in their full diversity and to illuminate their less frequented nooks and crannies in a timely fashion **The Cultural Semantics of Address Practices** Gian Marco Farese, 2018-08-15 This book presents a contrastive analysis of various forms of address used in English and Italian from the perspective of cultural semantics the branch of linguistics which investigates the relationship between meaning and culture in discourse The objects of the analysis are the interactional meanings expressed by different forms of address in these two languages which are compared adopting the methodology of the Natural Semantic Metalanguage The forms analyzed include greetings titles and opening and closing salutations used in letters and e mails in the two languages Noticeably the book presents the first complete categorization of Italian titles used as forms of address ever made on the basis of precise semantic criteria The analysis also investigates the different cultural values and assumptions underlying address practices in English and Italian and emphasizes the risks of miscommunication caused by different address practices in intercultural interactions Every chapter presents numerous examples taken from language corpora contemporary English and Italian literature and personal e mails and letters The book encourages a new innovative approach to the analysis of forms of address it proposes a new analytical method for the analysis of forms of address which can be applied to the study of other languages systematically In addition the book emphasizes the role of culture in address practices and takes meaning as the basis for understanding the differences in use across languages and the difficulties in translating forms of address of different languages Combining semantics ethnopragmatics intercultural communication and translation theory this book is aimed at a very broad readership which includes not only scholars in linguistics second language learners and students of cross cultural communication but virtually anyone interested in Italian and English linguistics as well as in cultural semantics The approach taken is interdisciplinary and brings together various fields in the social sciences linguistics anthropology cross cultural studies and sociology Everyday Conceptions of Emotion J.A. Russell, José-Miguel Fernández-Dols, Anthony S.R.

Manstead, Jane C. Wellenkamp, 2013-06-29 In *Everyday Conceptions of Emotion* prominent anthropologists linguists and psychologists come together for the first time to discuss how emotions are conceptualised by people of different cultures and ages speaking different languages Anger fear jealousy and emotion itself are concepts that are bound up with the English language embedded in a way of thinking acting and speaking At the same time the metaphors underlying such concepts are often similar across languages and children of different cultures follow common developmental pathways The book thus discusses the interplay of social and cultural factors that humans share in their development of an understanding of the affective side of their lives For researchers interested in emotion development of concepts and language cultural and linguistic influences on psychological processes
