Sensing Sound Listening Vibrational Transmission:

Sensing Sound Nina Sun Eidsheim, 2015-11-19 In *Sensing Sound* Nina Sun Eidsheim offers a vibrational theory of music that radically re envisions how we think about sound music and listening Eidsheim shows how sound music and listening are dynamic and contextually dependent rather than being fixed knowable and constant She uses twenty first century operas by Juliana Snapper Meredith Monk Christopher Cerrone and Alba Triana as case studies to challenge common assumptions about sound such as air being the default medium through which it travels and to demonstrate the importance a performance s location and reception play in its contingency By theorizing the voice as an object of knowledge and rejecting the notion of an a priori definition of sound Eidsheim releases the voice from a constraining set of fixed concepts and meanings In Eidsheim s theory music consists of aural tactile spatial physical material and vibrational sensations This expanded definition of music as manifested through material and personal relations suggests that we are all connected to each other in and through sound *Sensing Sound* will appeal to readers interested in sound studies new musicology contemporary opera and performance studies

The Performative Power of Vocality Virginie Magnat, 2019-12-06 *The Performative Power of Vocality* offers a fresh perspective on voice as a subject of critical inquiry by employing an interdisciplinary and cross cultural approach Conventional treatment of voice in theatre and performance studies too often regards it as a subcategory of actor training associated with the established methods that have shaped voice pedagogy within Western theatre schools conservatories and universities This monograph significantly deviates from these dominant models through its investigation of the non discursive material and affective efficacy of vocality with a focus on orally transmitted vocal traditions Drawing from her performance training research collaborations and commitment to cultural diversity Magnat proposes a dialogical approach to vocality Inclusive of established current and emerging research perspectives this approach sheds light on the role of vocality as a vital source of embodied knowledge creativity and well being grounded in process practice and place as well as a form of social and political agency An excellent resource for qualitative researchers artist scholars and activists committed to decolonization cultural revitalization and social justice this book opens up new avenues of understanding across Indigenous and Western philosophy performance studies musicology ethnomusicology sound and voice studies anthropology sociology phenomenology cognitive science physics ecology and biomedicine The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives CC BY NC ND 4.0 license

The Routledge Companion to Music and Modern Literature Rachael Durkin, 2022-05-26 Modern literature has always been obsessed by music It cannot seem to think about itself without obsessing about music And music has returned the favour *The Routledge Companion to Music and Modern Literature* addresses this relationship as a significant contribution to the burgeoning field of word and music studies The 37 chapters within consider the partnership through four lenses the universal opera and literature musical and literary forms and popular

music and literature and touch upon diverse and pertinent themes for our modern times ranging from misogyny to queerness racial inequality to the claimed universality of whiteness This Companion therefore offers an essential resource for all who try to decode the musico literary exchange We Travel the Space Ways Henriette Gunkel,kara lynch,2019-06-13 A new take on Afrofuturism this book gathers together a range of contemporary voices who carrying legacies of 500 years of contact between Africa Europe and the Americas reach towards the stars and unknown planets galaxies and ways of being Writing from queer and feminist perspectives and circumnavigating continents they recalibrate definitions of Afrofuturism The editors and contributors of this exciting volume thus reflect upon the re emergence of Black visions of political and cultural futures proposing practices identities and collectivities With contributions from AfroFuturist Affair John Akomfrah Jamika Ajalon Stefanie Alisch Jim Chuchu Grisha Coleman Thomas F DeFrantz Abigail DeVille M Asli Dukan with Wildseeds Kodwo Eshun Anna Everett Raimi Gbadamosi Alexis Pauline Gumbs Milumbe Haimbe Ayesha Hameed Kiluanji Kia Henda Kara Keeling Carla J Maier Tobias Nagl Tavia Nyongo Rasheedah Phillips Daniel Kojo Schrade Nadine Siegert Robyn Smith Greg Tate and Frohawk Two Feathers *Gallery Sound* Caleb Kelly,2017-08-24 Sound is an integral part of contemporary art Once understood to be a marginal practice increasingly we encounter sound in art exhibitions through an array of sound making works in various art forms at times played to very high audio levels However works of art are far from the only thing one might hear music performances floor talks exhibition openings and the noisy background sounds that emanate from the gallery caf fill contemporary exhibition environments Far from being hallowed spaces of quiet reflection what this means is that galleries have swiftly become very noisy places As such a straightforward consideration of artworks alone can then no longer account for our experiences of art galleries and museums To date there has been minimal scholarship directed towards the intricacies of our experiences of sound that occur within the bounds of this purportedly visual art space Kelly addresses this gap in knowledge through the examination of historical and contemporary sound in gallery environments broadening our understanding of artists who work with sound the institutions that exhibit these works and the audiences that visit them Gallery Sound argues for the importance of all of the sounds to be heard within the walls of art spaces and in doing so listens not only to the deliberate inclusion of sound within the art gallery in the form of artworks performances and music but also to its incidental sounds such as their ambient sounds and the noise generated by audiences More than this however Gallery Sound turns its attention to the ways in which the acoustic characteristics specific to gallery spaces have been mined by artists for creative outputs ushering in entirely new art forms *The Race of Sound* Nina Sun Eidsheim,2019-01-11 Examining singers Marian Anderson Billie Holiday and Jimmy Scott as well as vocal synthesis technology Nina Sun Eidsheim traces the ways in which the voice and its qualities are socially produced and how listeners assign a series of racialized and gendered set of assumptions to a singing voice Haptic and Audio Interaction Design M.
