## **Sensing Technology Applications 2015 Technologies:**

**Computer and Computing Technologies in Agriculture** X Daoliang Li, 2019-01-05 This book constitutes the refereed post conference proceedings of the 10th IFIP WG 5.14 International Conference on Computer and Computing Technologies in Agriculture CCTA 2016 held in Dongying China in October 2016. The 55 revised papers presented were carefully reviewed and selected from 128 submissions. They cover a wide range of interesting theories and applications of information technology in agriculture including intelligent sensing, cloud computing, key technologies of the Internet of Things, precision agriculture, animal husbandry, information technology including Internet modern animal husbandry, livestock, big data platform and cloud computing applications, intelligent breeding equipment, precision production models, water product networking and big data including fishery IoT, intelligent aquaculture facilities and big data applications. **Software**

**Engineering Research, Management and Applications** Roger Lee, 2016-06-06 This edited book presents scientific results of the 14th International Conference on Software Engineering, Artificial Intelligence Research, Management and Applications SERA 2016 held on June 8-10, 2016 at Towson University, USA. The aim of this conference was to bring together researchers and scientists, businessmen and entrepreneurs, teachers, engineers, computer users and students to discuss the numerous fields of computer science and to share their experiences and exchange new ideas and information in a meaningful way. Research results about all aspects, theory, applications and tools of computer and information science and to discuss the practical challenges encountered along the way and the solutions adopted to solve them. The conference organizers selected the best papers from those papers accepted for presentation at the conference. The papers were chosen based on review scores submitted by members of the program committee and underwent further rigorous rounds of review. This publication captures 13 of the conference's most promising papers and we impatiently await the important contributions that we know these authors will bring to the field of computer and information science. **3S Technology Applications in Meteorology**

Shuanggen Jin, 2023-10-19 Spatial information technology and its integration such as remote sensing, geographic information systems, GIS and global navigation satellite systems GNSS, known as 3S technology, have been extensively utilized in managing and monitoring natural disasters. This book illustrates the 3S integrated applications in the field of meteorology and promotes the role of 3S in developing precise and intelligent meteorology. It presents the principles of 3S technology and the methods for monitoring different meteorological disasters and hazards as well as their application progress. The case studies from the United States, Japan, China and Europe were conducted to help all countries understand the 3S technology functions in handling and monitoring severe meteorological hazards. **FEATURES** Presents integral observations from GNSS, GIS and remote sensing in estimating and understanding meteorological changes. Explains how to monitor and retrieve atmospheric parameter changes using GNSS and remote sensing. Shows three-dimensional modelling and evaluations of meteorological variation processing based on GIS. Helps meteorologists develop and use space-air-ground integrated

observations for meteorological applications Illustrates the practices in monitoring meteorological hazards using space information techniques and case studies This book is intended for academics researchers and postgraduate students who specialize in geomatics atmospheric science and meteorology as well as scientists who work in remote sensing and meteorology and professionals who deal with meteorological hazards

**Commercial Space Technologies and Applications: Communication, Remote Sensing, GPS, and Meteorological Satellites, Second Edition** Mohammad Razani, 2018-09-03 This new edition introduces and examines the space technologies that benefit our everyday lives Each chapter now includes exercises and problems and the content covers new satellites and emerging technologies It explores the ever improving quality of satellite systems and services and also investigates ways to bring about higher resolution satellite imagery and lower satellite costs The focus is on man made satellites which are becoming smaller smarter cheaper and easier to launch having a longer life span and are less susceptible to interference Furthermore the book considers advances in several key technologies that affect the satellite industry Includes extensive study questions and exercises after each chapter Explains present commercial space technology and its future outlook Explores the many applications of space technologies and their impact on our lives including real world examples Presents a future outlook on robotics communications and navigation and human health and nanotechnology Provides a clear understanding of space space technologies space applications space security space regulations a space roadmap and their impact on the lives of humans now and for generations to come
