INSTRUCTIONS

Serpent's long tradition of excellence extends to the instruction manuals, and this instruction manual is no exception. The easy-to-follow layout is richly illustrated with 3D-rendered full-color images to make your building experience quick and easy. Following the instructions will result in a well-built, high-performance rc-car that will soon be able to unleash its full potential at the racetrack. The kit includes tags, with components, which refer to the same step in the manual. Cover only the indicated layer per step and finish that part of the assembly. Remaining parts will be needed later on in the assembly process.

PLASTIC PARTS

The Serpent moulded parts are very durable and hard. When assembling longer screws in new composite parts, make sure to use new hex bits or your spacers/bits. Pre-threading also helps to avoid some damage.

SETUP

In certain assembly steps you need to make basic adjustments, which will give you a good initial setup for your Serpent Cobra SR08. Fine-tuning the initial setup is an essential part of building a high-performance receiver like your Serpent Spyder SRX2 MHT.

EXPLODED VIEWS AND PARTS LIST

The exploded views and parts lists for the Serpent Spyder SRX2 MHT are presented in the Reference Guide section in the back of this manual. The exploded views show all the parts of a particular assembly step
