

Service Manual

NISSAN Automobile Genuine Woofer Amplifier

Model **EN-1204D**
(Genuine No.28060 7Y000)

SPECIFICATIONS

Gain:	10+3dB/-3dB(280mV, 60Hz)
S/N ratio:	More than 74dB(60Hz)
Distortion:	Less than 0.2%(60Hz)
Maximum power output:	40W x2
Speaker impedance:	2 ohm
Power supply voltage:	DC13.2V negative ground
Dimensions(mm):	107(W) x36(H) x110(D)
Weight:	500g

CAUTION

- We cannot supply PWB with component parts in principle. When a circuit on PWB has failure, please repair it by component parts base. Parts which are not mentioned in service manual are not supplied.
- Specification and design are subject to change without notice for further improvement.

COMPONENTS

EN-1204D-A
Main unit

----- 1

To engineers in charge of repair or inspection of our products.

Before repair or inspection, make sure to follow the instructions so that customers and Engineers in charge of repair or inspection can avoid suffering any risk or injury.

- Use specified parts.
The system uses parts with special safety features against fire and voltage. Use only parts with equivalent characteristics when replacing them.
The use of unspecified parts shall be regarded as re-modeling for which we shall not be liable. The onus of

product liability (PL) shall not be our responsibility in cases where an accident or failure is as a result of unspecified parts being used.

- Place the parts and wiring back in their original positions after replacement or re-wiring.
For proper circuit construction, use of insulation tubes, bonding tape to PWB, etc., is involved. The wiring connection and routing to the PWB are specially planned using clamps to keep away from heated and high voltage parts. Ensure that they are placed back in their original positions after repair or inspection.
If extended damage is caused due to negligence during repair, the legal responsibility shall be with the repairing company.
- Check for safety after repair.
Check that the screws, parts and wires are put back securely in their original position after repair. Ensure for safety reasons there is no possibility of secondary problems around the repaired spots.
If extended damage is caused due to negligence of repair, the legal responsibility shall be with the repairing company.
- Caution in removal and making wiring connection to the parts for the automobile.
Disconnect the battery terminal after turning the ignition key off. If wrong wiring connections are made with the battery connected, a short circuit and/or fire may occur.
If extensive damage is caused due to negligence of repair, the legal responsibility shall be with the repairing company.
- Cautions regarding chips.
Do not reuse removed chips even when no abnormality is observed in their appearance. Always replace them with new ones. (The chip parts include resistors, capacitors, diodes, transistors, etc.) The negative pole of tantalum capacitors is highly susceptible to heat, so use special care when replacing them and check the operation afterwards.
