PHYSICS

LEVEL 2

Strategy Guide

This standard is one of the shorter ones in level 2 physics. It can be intimidating as there are a lot of formulae and diagrams that you may not have seen before. However, once you get your head around the new terms, and get in lots of practice drawing ray diagrams, you will find that the standard is pretty repetitive - and it's completely possible to get a good mark in it!

OVERVIEW OF THE STANDARD

- Reflection (real and virtual images)
- Refraction
- Interference

STRUCTURE OF THE EXAM

Warning: this section is to help you focus your time/study. Our analysis is based off previous year's exams and is no substitute for understanding the concepts. NCEA can change the exam format without much notice, so the best strategy is to be prepared for anything!

There are generally 3-4 questions, with one focused on reflection, one on refraction, and the others about interference. The reflection question will ask you to draw ray diagrams, and discuss whether images are real or virtual. Be prepared to discuss diffraction and constructive and destructive interference for the interference questions, and be able to draw wavefronts moving through different media.

CONCEPTS AND SKILLS TO FOCUS ON

Although every aspect of the exam is equally important, here are some key concepts to focus your study on:

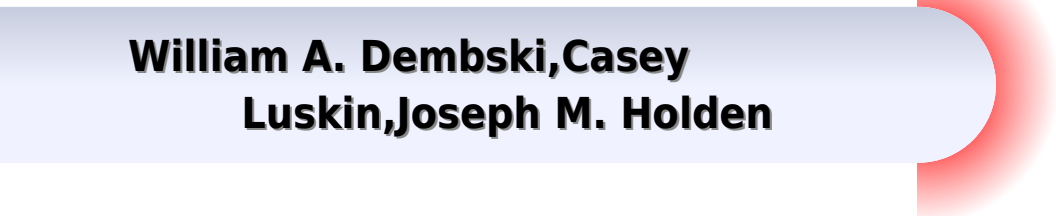

Drawing ray diagrams:

We can't emphasise this one enough! You're almost guaranteed to have to draw a ray diagram or two in your exam. Although they seem confusing at first, once you become comfortable with them, they make up some almost guaranteed Merit marks. Make sure you practice drawing ray diagrams for convex and concave lenses and mirrors - the more prepared you are, the less time you'll spend stressing in your exam! Also, while you're at it, make sure you know how to describe images as real or virtual, as these questions almost always come after a ray diagram.
