Multiple Constructions Language Benjamins Current:

Current Approaches to Syntax András Kertész, Edith Moravcsik, Csilla Rákosi, 2019-05-06 Even though the range of phenomena syntactic theories intend to account for is basically the same the large number of current approaches to syntax shows how differently these phenomena can be interpreted described and explained The goal of the volume is to probe into the question of how exactly these frameworks differ and what if anything they have in common Descriptions of a sample of current approaches to syntax are presented by their major practitioners Part I followed by their metatheoretical underpinnings Part II Given that the goal is to facilitate a systematic comparison among the approaches a checklist of issues was given to the contributors to address The main headings are Data Goals Descriptive Tools and Criteria for Evaluation The chapters are structured uniformly allowing an item by item survey across the frameworks The introduction lays out the parameters along which syntactic frameworks must be the same and how they may differ and a final paper draws some conclusions about similarities and differences The volume is of interest to descriptive linguists theoreticians of grammar philosophers of science and studies of the cognitive science of science Constructional Approaches to Nordic Languages Evie Coussé, Steffen Höder, Benjamin Lyngfelt, Julia Prentice, 2023-11-15 This volume presents eight studies of linguistic phenomena in Nordic languages notably Danish Norwegian and Swedish from a construction grammar perspective The contributions both deepen and widen the focus of construction grammar applied to Nordic languages by dealing with a variety of topics such as the constructional network pseudo coordination additional language learning and emerging multilingualism prototypical semantics in argument structure constructions and domain specific discourse and language behavior The volume showcases the vibrant research activity within part of the construction grammar community dealing with Nordic languages contributing to the knowledge about the structure use and learning of these languages as well as to the field of construction grammar as a whole Late Modern English Syntax Marianne Hundt, 2014-08-14 The Late Modern period is the first in the history of English for which an unprecedented wealth of textual material exists Using increasingly sophisticated databases the contributions in this volume explore grammatical usage from the period specifically morphological and syntactic change in a broad context Some chapters explore the socio historical background of the period while others provide information on prescriptivism newspaper language language contact and regional variation in British and American English Internal processes of change are discussed against grammaticalisation theory and construction grammar and the rich body of textual evidence is used to draw inferences on the precise nature of historical change Exposing readers to a wealth of data that informs the description of a broad range of syntactic phenomena this book is ideal for graduate students and researchers interested in historical linguistics corpus linguistics and language development

Constructicography Benjamin Lyngfelt, Lars Borin, Kyoko Ohara, Tiago Timponi Torrent, 2018-07-17 In constructionist theory a constructicon is an inventory of constructions making up the full set of linguistic units in a language In applied

practice it is a set of construction descriptions a dictionary of constructions The development of constructions in the latter sense typically means combining principles of both construction grammar and lexicography and is probably best characterized as a blend between the two traditions We call this blend constructicography The present volume is a comprehensive introduction to the emerging field of constructicography After a general introduction follow six chapters presenting construction projects for English German Japanese Brazilian Portuguese Russian and Swedish respectively often in relation to a frame net of the language In addition there is a chapter addressing the interplay between linguistics and language technology in construction development and a final chapter exploring the prospects for interlingual constructicography This is the first major publication devoted to construction development and it should be particularly relevant for those interested in construction grammar frame semantics lexicography the relation between grammar and lexicon or linguistically informed language technology

The Construct of Identity in Hellenistic Judaism Erich S. Gruen, 2016-09-12 This book collects twenty two previously published essays and one new one by Erich S Gruen who has written extensively on the literature and history of early Judaism and the experience of the Jews in the Greco Roman world His many articles on this subject have however appeared mostly in conference volumes and *Festschriften* and have therefore not had wide circulation By putting them together in a single work this will bring the essays to the attention of a much broader scholarly readership and make them more readily available to students in the fields of ancient history and early Judaism The pieces are quite varied but develop a number of connected and related themes Jewish identity in the pagan world the literary representations by Jews and pagans of one another the interconnections of Hellenism and Judaism and the Jewish experience under Hellenistic monarchies and the Roman empire

Discourse Constructions in English Aneider Iza Erviti, 2021-05-29 This book emphasizes the advantages of examining discourse connectivity from a constructionist perspective and highlights the role of discourse configurations in the construction of meaning The research contained advances the field of cognitive classification and categorization of discourse constructions The text is a great improvement in the discourse analysis literature since it uniquely clarifies the subtleties of meaning between different discourse markers that are frequently treated as equivalent by lexicographers It is unique in being the first contribution to the creation of a Constructicon at the discourse level and it fills an important gap within cognitively oriented constructionist accounts that have mostly restricted their analyses to argument structure and illocutionary constructions This yearbook appeals to students and researchers working within corpus linguistics

Viewpoint in Language Barbara Dancygier, Eve Sweetser, 2012-04-12 What makes us talk about viewpoint and perspective in linguistic analyses and in literary texts as well as in landscape art Is this shared vocabulary marking real connections between the disparate phenomena This volume argues that human cognition is not only rooted in the human body but also inherently viewpointed as a result consequently so are language and communication Dancygier and Sweetser bring together researchers who do not typically meet on common ground analysts of

narrative and literary style linguists examining the uses of grammatical forms in signed and spoken languages and analysts of gesture accompanying speech Using models developed within cognitive linguistics the book uncovers surprising functional similarities across various communicative forms arguing for specific cognitive underpinnings of such correlations What emerges is a new understanding of the role and structure of viewpoint and a groundbreaking methodology for investigating communicative choices across various modalities and discourse contexts

Case Studies of Linguistic Representations of Motion Yo Matsumoto, 2025-02-17 How languages describe spatial motion events has been a hotly discussed topic in recent years in cognitive linguistics and linguistic typology This two volume book provides new descriptions and proposals on this fascinating topic based on a large scale experimental study of motion event descriptions in almost 20 languages across the globe as part of a research project conducted by NINJAL The chapters are based on papers presented at international conferences most at NINJAL international symposium held in January 2019 some at International Cognitive Linguistics Conferences in 2017 and 2019 This volume provides valuable descriptions of familiar and unfamiliar languages as well as insightful discussions of controversial issues based on those descriptions This book would interest students in linguistics and cognitive science in Asia Pacific Europe and North America

Recent Perspectives on Task-Based Language Learning and Teaching Mohammad Ahmadian, María del Pilar García Mayo, 2017-12-04 The last three decades have witnessed a growth of interest in research on tasks from various perspectives and numerous books and collections of articles have been published focusing on the notion of task and its utility in different contexts Nevertheless what is lacking is a multi faceted examination of tasks from different important perspectives This edited volume with four sections of three chapters each views tasks and Task based Language Teaching TBLT from four distinct but complementary vantage points In the first section all chapters view tasks from a cognitive interactionist angle with each addressing one key facet of either cognition or interaction or both in different contexts CALL and EFL ESL Section two hinges on the idea that language teaching and learning is perhaps best conceptualized understood and investigated within a complexity theory framework which accounts for the dynamicity and interrelatedness of the variables involved Viewing TBLT from a sociocultural lens is what connects the chapters included in the third section Finally the fourth section views TBLT from pedagogical and curricular vantage points

The Routledge Handbook of Cognitive Linguistics Wen Xu, John R. Taylor, 2021-06-03 The Routledge Handbook of Cognitive Linguistics provides a comprehensive introduction and essential reference work to cognitive linguistics It encompasses a wide range of perspectives and approaches covering all the key areas of cognitive linguistics and drawing on interdisciplinary and multidisciplinary research in pragmatics discourse analysis biolinguistics ecolinguistics evolutionary linguistics neuroscience language pedagogy and translation studies The forty three chapters written by international specialists in the field cover four major areas Basic theories and hypotheses including cognitive semantics cognitive grammar construction grammar frame semantics natural semantic metalanguage and word grammar Central topics including
