Chapter 1 & 2 - Review of Basic Concepts

- **Describe the 3 states of matter.** The three states of matter are *solid*, *liquid*, and *gas*.
 - **Solid:** When atoms in a material are moving slow that they stick together and barely move, creating a hard object classified as a solid
 - **Liquid:** When atoms are moving slower than a gas state but faster than the solid state so they flow and are able to take the shape of their container. They have more energy than solid state atoms.
 - **Gas:** When atoms are moving faster than the other two states of matter (solid & liquid) that they are no longer pulled towards each other and roam freely without boundaries if not kept in a container.
- **Describe the difference between elements and compounds, mixtures.**
 - **Elements:** materials that are only made out of the same *type* of atoms and cannot be changed into simpler substances by a chemical change (ex: O_2)
 - **Compounds:** materials that are a mix of two or more element in a fixed proportion
 - **Mixtures:** a mixture of 2 or more pure substances.
 - **Heterogeneous Mixture:** can often be separated by filtration
 - **Homogenous Mixture:** can be separated by distillation, crystallization, and chromatography
- **Convert between Celsius and Kelvin.**
 - **Celsius to Kelvin:** $C = (^{\circ}K - 273.15)$
 - **Kelvin to Celsius:** $K = (^{\circ}C + 273.15)$
- **Round measured and calculated values to the correct number of significant digits.**
 - Significant Digit Rules: [\[CHEM\] Final 1 - Steps & Processes](#)
- **Use dimensional analysis to solve multi step equations, showing how units cancel**
[\[CHEM\] Final 1 - Steps & Processes](#)
- **What is the difference between precision and accuracy?**
 - **Precision:** Acquiring the same result again and again
 - **Accuracy:** A result that is close to the accepted value/actual answer

Hazmat Chemistry Study Guide (Second Edition) Jill Meryl Levy, 2011

God's Perfect Plan Mark Paul Bishop, 2011-06

While working in the ER one evening the nurse called to tell me that Pastor Steve would like to talk with me. As I shared my thoughts with Pastor Steve the simplicity of his responses almost left me speechless. It was from this life-changing conversation that Dr. Mark Paul Bishop began a life devoted to Christ, exhausting his human potential in service to his fellow man. **God's Perfect Plan** is Dr. Mark's spiritual autobiography and details his faith journey as he wrestles with issues directly pointing to the deficiency of our lives, a deficiency that he learned can only be filled through a relationship with Christ. Readers will be inspired as they seek their own answers to questions regarding God's perfect plan in their own lives. Woven into the fabric of God's perfect plan for you, you will discover the role of our social institutions, the family, church, school, community, and government. You will be further amazed by the manner in which God incubates His plan for your life through His divine guidance and protection. See how this family physician, despite skepticism and wavering faith, demonstrates how God's purpose and plan is clear in our lives if we only look for it. The practical application of Christianity is not a myth; it really does work. See for yourself as you discover God's perfect plan. [Concepts of Earth Science & Chemistry Parent Lesson Plan](#)

John Hudson Tiner, 2013-08-26 **Concepts of Earth and Chemistry Course Description** This is the suggested course sequence that allows one core area of science to be studied per semester. You can change the sequence of the semesters per the needs or interests of your student. Materials for each semester are independent of one another to allow flexibility. Semester 1: Earth. Blending a creationism perspective of history with definitions of terms and identification of famous explorers/scientists, etc., this book gives students an excellent initial knowledge of people and places, encouraging them to continue their studies in depth. Semester 2: Chemistry. Chemistry is an amazing branch of science that affects us every day, yet few people realize it or even give it much thought. Without chemistry, there would be nothing made of plastic, there would be no rubber tires, no tin cans, no televisions, no microwave ovens, or something as simple as wax paper. This book presents an exciting and intriguing tour through the realm of chemistry as each chapter unfolds with facts and stories about the discoveries of discoverers. Find out why pure gold is not used for jewelry or coins. Join Humphry Davy as he made many chemical discoveries and learn how they shortened his life. See how people in the 1870s could jump over the top of the Washington Monument. **Exploring the World of Chemistry** brings science to life and is a wonderful learning tool with many illustrations and biographical information. **Directory of Distance Learning Opportunities** Modoc Press, Inc., 2003-02-28

This book provides an overview of current K-12 courses and programs offered in the United States as correspondence study or via such electronic delivery systems as satellite cable or the Internet.
