New Approaches To Qualitative Research Wisdom And Uncertainty:

New Approaches to Qualitative Research Maggi Savin-Baden, Claire Howell Major, 2010-04-08 Qualitative research has seen a surge of growth during the past decade This is in large part because positivist approaches have not yielded the kinds of results that had been anticipated and more researchers are seeking alternative perspectives to understand phenomena The number of researchers using qualitative approaches continues to grow yet there are few up to date guides to assist thinking broadly about qualitative research as a field of inquiry Over the decades the range of approaches has increased which has led to an even greater lack of certainty about how to think about doing qualitative research In considering key issues while offering practical guidance on how to work within the face of uncertainty this book will be a valuable resource to this next generation of researchers New Approaches to Qualitative Research offers a clear understanding of the range of issues related to researcher stance the way that researchers position themselves in relation to their subjects their participants and their own belief systems and the way in which they locate themselves across the qualitative paradigm an overview of some of the most cutting edge qualitative techniques in use today from the exploration of visual texts to the concept of inquiry to synthesis methods this section lays out the state of the art in methodology specific information regarding processes of data analysis synthesis and interpretation that are employed in these various approaches In this book the authors take the stance that qualitative research is a broad approach that encompasses and even encourages difference and uncertainty and here at last they provide a route map to this uncertain but fruitful line of inquiry This vital text is ideal for professional researchers and postgraduates in a range of subject areas

Thinking Qualitatively Johnny Saldana, 2014-09-03 Written in Johnny Salda a s elegant and accessible style Thinking Qualitatively Methods of Mind boldly pursues the challenge of teaching students not just how to collect and analyze data but how to actively think about them Each chapter presents one method of mind thinking analytically realistically symbolically ethically multidisciplinarily artistically summarily interpretively and narratively together with applications a vignette or story related to the thinking modality points to remember and exercises Designed to help researchers rise above the data the book explores how qualitative research designs data collection data analyses and write ups can be enriched through over 60 different lenses filters and angles on social life Venturing into more evocative and multidimensional ways to examine the complex patterns of daily living the book reveals how the researcher s mind thinks heuristically to transcend the descriptive and develop highdeep insights about the human condition This is a book for all qualitative methodologists Not just a how to manual but an epistemological exercise in understanding qualitative methods Cassie F Quigley Clemson University This book fills an important void in the field The market is crowded with books on techniques and strategies for conducting qualitative research Salda a s volume provides a vital complement by encouraging students to develop the core analytical skills and interpretive frames they need to be truly successful in their research endeavors He helps students flex and hone the

epistemological muscles that are at the center of capable qualitative research John P Bartkowski University of Texas at San Antonio The focus of the book is clear and consistent The writing is superb It deals with sophisticated ideas in a clear and highly communicative style It weaves important and relevant scholarship in ways that help the reader grasp the key ideas It is one of the best books I have read Liora Bresler University of Illinois at Urbana Champaign Thinking Qualitatively invites students to think before they act and offers a rich set of options for qualitative researchers to consider Michael Brown University of Wyoming This book brings together key ways of thinking about our work as qualitative researchers In many ways it captures the breadth and depth of our work while calling for us to be ever reflexive about our practices I see this book as positively informing the work of novice and experienced researchers It is a much needed addition to the qualitative research community Jessica Nina Lester Indiana University

Researching Private Supplementary Tutoring Mark Bray, Ora Kwo, Boris Jokić, 2016-03-01 Private supplementary tutoring widely known as shadow education because of the way that it mimics mainstream schooling has greatly expanded worldwide It consumes considerable family resources provides employment for tutors occupies the time of students and has a backwash on regular schools Although such tutoring has become a major industry and a daily activity for students tutors and families the research literature has been slow to catch up with the phenomenon The topic is in some respects difficult to research precisely because it is shadowy Contours are indistinct and the actors may hesitate to share their experiences and perspectives Presenting methodological lessons from diverse cultures the book contains chapters from both high income and low income settings in Asia Caribbean Europe and the Middle East Separately and together the chapters present valuable insights into the design and conduct of research The book will assist both consumers and producers of research Consumers will become better judges of the strengths weaknesses and orientations of literature on the theme and producers will gain insights for design of instruments collection of data and interpretation of findings The editors Mark Bray is UNESCO Chair Professor in Comparative Education at the University of Hong Kong Ora Kwo is an Associate Professor in the Comparative Education Research Centre at the University of Hong Kong Boris Joki is a Scientific Associate in the Centre for Educational Research and Development at the Institute for Social Research in Zagreb Croatia
