New Directions in Anthropology and Environment Carole L. Crumley, 2002-05-09 Carole L. Crumley has brought together top scholars from across anthropology in a benchmark volume that displays the range of exciting new work on the complex relationship between humans and the environment. Continually pursuing anthropology's persistent claim that both the physical and the mental world matter, these environmental scholars proceed from the holistic assumption that the physical world and human societies are always inextricably linked. As they incorporate diverse forms of knowledge, their work reaches beyond anthropology to bridge the sciences, social sciences, and the humanities, and to forge working relationships with non-academic communities and professionals. Theoretical issues such as the cultural dimensions of context, knowledge, and power are articulated alongside practical discussions of building partnerships, research methods, and ethics, and strategies for implementing policy. *New Directions in Environment and Anthropology* will be important for all scholars and non-academics interested in the relation between our species and its biotic and built environments. It is also designed for classroom use in and beyond anthropology, and students will be greatly assisted by suggested reading lists for their further exploration of general concepts and specific research. Sustainable Communities and Green Lifestyles Tendai Chitewere, 2017-08-09 Sustainable communities raise questions about the compatibility of capitalism and environmentalism and how we can green our way of life in a capitalist economy that values short-term production and consumption over long-term conservation and simple living. If capitalism and its drive towards consumption has produced social and environmental degradation, is it the best medium to identify solutions? *Sustainable Communities and Green Lifestyles* examines one

ecovillage as it attempts to create a sense of community while reducing its impact on the natural environment Through extensive participant observation the book demonstrates how ecovillages are immersed within a larger discourse of class race and lifestyle choices highlighting the inseparability of environmental sustainability and social justice Sustainable communities are confronted by the contradictions of green consumption and must address social inequality or risk focusing inward on personal green consumerism creating mere green havens for the few who can afford to live in them This book cautious of redirecting environmentalist efforts away from structural solutions and onto personal environmentalism offers a critical perspective on the challenges of an emerging green lifestyle This book offers a critical perspective on the direction of US environmentalism and contributes to debates in environmental studies anthropology and urban planning The Anthropocene of Weather and Climate Paul Sillitoe,2021-10-15 While it is widely acknowledged that climate change is among the greatest global challenges of our times it has local implications too This volume forefronts these local issues giving anthropology a voice in this great debate which is otherwise dominated by natural scientists and policy makers It shows what an ethnographic focus can offer in furthering our understanding of the lived realities of climate debates Contributors from communities around the world discuss local knowledge of and responses to environmental changes that need to feature in scientifically framed policies regarding mitigation and adaptation measures if they are to be effective

The Future of Ecocriticism Serpil Oppermann,Ufuk Özdağ,Nevin Özkan,2011-05-25 As we enter the second decade of the twenty first century environmental concerns dominate the media headlines from rampant poverty in the developing world to nuclear accidents in industrialized nations How did human civilization arrive at its current predicaments and what can we do to temper our habits of mind and mitigate society s environmentally and socially destructive behaviors The field of ecocriticism also sometimes called environmental criticism attempts to grapple with such issues A branch of literary and cultural studies that essentially began in North America in the 1970s ecocriticism is currently one of the most quickly developing areas of environmental research and teaching The Future of Ecocriticism New Horizons brings together thirty two of the latest articles in the field including work by some of the leading scholars from around the world Although ecocriticism has been particularly active in North America Western Europe and East Asia important studies of traditional environmental thought environmental communication strategies and environmental aesthetics have begun to emerge in every region of this world This new book co edited by three prominent Turkish scholars and a leading American ecocritic offers a special cluster of Turkish ecocriticism with a focus on environmental stories and ideas in this culture that bridges Europe and Asia Another unique feature of The Future of Ecocriticism New Horizons is the concluding dialogue among the four editors about the current state of the field **Positive Ecology** Gerald Schmidt,2018-01-17 Until recently there has been a widespread view that we must give up amenities of modern life in order to achieve environmental sustainability While newspapers and other popular media tend to focus on the negative aspects of environmental change this volume examines

the alternative notion of positive ecology Initially gleaned from the orientation of positive psychology this argues that environmental science has been all too focused on analysing negative pathologies and forgetting to provide more positive analysis and activism for sustainability Bringing together a wide range of positive ecology orientated case studies for the first time the book discusses the wider contexts of how humanity is dependent on a functioning biodiverse ecosphere of which we are only one part It provides an original and previously undervalued approach to sustainability and suggests that work towards sustainability is not only a necessity for our children s future but necessary sensible and meaningful in the present

Valuation and Conservation of Biodiversity Michael Markussen,2005-01-13 The goal of this transdisciplinary book is to identify the problems and challenges facing implementation of the Convention on Biological Diversity CBD from the global regional and local points of view The valuation and conservation of biodiversity are critical first steps necessary for the adequate protection of the environment The authors give insights into the the influences the CBD exerts and current trends in the field

Nature Across Cultures Helaine Selin,2013-04-17 *Nature Across Cultures* Views of Nature and the Environment in Non Western Cultures consists of about 25 essays dealing with the environmental knowledge and beliefs of cultures outside of the United States and Europe In addition to articles surveying Islamic Chinese Native American Aboriginal Australian Indian Thai and Andean views of nature and the environment among others the book includes essays on Environmentalism and Images of the Other Traditional Ecological Knowledge Worldviews and Ecology Rethinking the Western non Western Divide and Landscape Nature and Culture The essays address the connections between nature and culture and relate the environmental practices to the cultures which produced them Each essay contains an extensive bibliography Because the geographic range is global the book fills a gap in both environmental history and in cultural studies It should find a place on the bookshelves of advanced undergraduate students graduate students and scholars as well as in libraries serving those groups

The SAGE Handbook of Environment and Society Jules Pretty,Andy Ball,Ted Benton,Julia Guivant,David R Lee,David Orr,Max Pfeffer,Professor Hugh Ward,2007-10-30 A monumental and timely contribution to scholarship on society and environments The handbook makes it easy and compelling for anyone to learn about that scholarship in its full manifestations and as represented by some of the most highly respected researchers and thinkers in the English speaking world It is wide reaching in scope and far reaching in its implications for public and private action a definite must for serious researchers and their libraries Bonnie J McCay Rutgers University This is the desert island book for anyone interested in the relationship between society and the environment The editors have assembled a masterful collection of contributions on every conceivable dimension of environmental thinking in the social sciences and humanities No library should be without it Robyn Eckersley University of Melbourne The SAGE Handbook of Environment and Society focuses on the interactions between people societies and economies and the state of nature and the environment Editorially integrated but written from multi disciplinary perspectives it is organised in seven sections Environmental thought past and

present Valuing the environment Knowledges and knowing Political economy of environmental change Environmental technologies Redesigning natures Institutions and policies for influencing the environment Key themes include locations where the environment society relation is most acute where for example there are few natural resources or where industrialization is unregulated the discussion of these issues at different scales local regional national and global the cost of damage to resources and the relation between principal actors in the environment society nexus Aimed at an international audience of academics research students researchers practitioners and policy makers The SAGE Handbook of Environment and Society presents readers in social science and natural science with a manual of the past present and future of environment society links *Historical Ecologies, Heterarchies and Transtemporal Landscapes* Celeste Ray, Manuel Fernández-Götz, 2019-04-23 Interlacing varied approaches within Historical Ecology this volume offers new routes to researching and understanding human environmental interactions and the heterarchical power relations that shape both socioecological change and resilience over time Historical Ecology draws from archaeology archival research ethnography the humanities and the biophysical sciences to merge the history of the Earth s biophysical system with the history of humanity Considering landscape as the spatial manifestation of the relations between humans and their environments through time the authors in this volume examine the multi directional power dynamics that have shaped settlement agrarian monumental and ritual landscapes through the long term field projects they have pursued around the globe Examining both biocultural stability and change through the longue dur e in different regions these essays highlight intersectionality and counterpoised power flows to demonstrate that alongside and in spite of hierarchical ideologies the daily life of power is heterarchical Knowledge of transtemporal human environmental relationships is necessary for strategizing socioecological resilience Historical Ecology shows how the past can be useful to the future
