Proceedings Natural Philosophy Alliance Conference:

20th Natural Philosophy Alliance Proceedings David de Hilster, 2013-07-03 Natural Philosophy Alliance published in conjunction with the 20th Annual Natural Philosophy Alliance conference 19th Natural Philosophy Alliance Proceedings Greg Volk, 2012-07-14 The Natural Philosophy Alliance NPA sponsors regular international conferences for presenting high quality papers discussing aspects of philosophy in the sciences Many papers offer challenges to accepted orthodoxy in the sciences especially in physics Everything from the micro physics of quantum mechanics to the macro physics of cosmology is entertained Though the main interest of the NPA is in challenging orthodoxy in the sciences it will also feature papers defending such orthodoxy Our ultimate propose is to enable participants to articulate their own understanding of the truth All papers are reviewed by society officers and sometimes by other members before presentation in conferences and they are edit sometimes very significantly prior to publication in the Proceedings of the NPA **Proceedings of the Natural**

Philosophy Alliance Dr Nina Sotina Editor, Nina Sotina, 2015-12-01 The Proceedings is a collection of papers from NPA members that were presented at the 21st Annual NPA Conference held November 19 21 2014 in Baltimore MD USA NPA Conferences attract scientists from around the world who work in many different areas of science and are interested in pursuing alternatives to the mainstream The present proceedings include papers on critical analysis of the theory of relativity gravitational and climate anomalies alternative explanations of some astronomical phenomena and the causal interpretation of quantum mechanics Some of the ideas presented here might appear to be incorrect while on the other hand many could develop into new areas of physics in the future NPA authors follow uncharted paths and we cannot require the same scientific accuracy from research publications on new concepts as we expect from works in mainstream science Publishing works with new concepts is absolutely necessary in order to chart new directions and to avoid monopolies in physics

CNPS Proceedings 2017 David de Hilster, 2017-07-07 The John Chappell Natural Philosophy Society CNPS provides an open forum for the study debate and presentation of serious scientific ideas theories philosophies and experiments that are not commonly accepted in mainstream science The CNPS uses the term Natural Philosophy in its broader sense which includes physics cosmology mathematics and the philosophy of science Our goal is to return to the basics where things went wrong and start anew **CNPS Proceedings 2015** David de Hilster, 2015-07-17 Annual Proceedings of the John Chappell Natural Philosophy Society CNPS which accepts papers that challenge mainstream physics and cosmology These proceedings are in conjunction with the 1st annual conference in 2015 of the CNPS at Florida Atlantic University Boca Raton Florida

Proceedings, International Conference : Storrs, Connecticut, June 9 - 13, 2003 ; [... Natural Philosophy Alliance International Meeting] Natural Philosophy Alliance, Cynthia Kolb Whitney, 2003 Einstein's Destruction of Physics Peter Ujak, 2018-02-09 This book is intended for anyone who is interested in a real physical image and order of the physical world surrounding us In this book Einstein's destruction of physics is documented The physical reality of gravity inertial forces

mass time double slit experiment is debunked It shows that Quarks and Higgs bosons do not exist and that all elementary particles all rigid matter and all force fields in the Universe are created from compression of ether It show that Einstein after 1916 became a more enthusiastic advocate of the proven existence of the ether than supporters of the ether before 1905 The aim of this book is to return physics from its way of metaphysics in the 20th century on the way of the physical reality in the 21st century This second edition of this book was augmented by twenty pages compared to its first edition After this augmentation it appears that the argumentation about the unacceptability of the ill founded physical theories of the 20th century represents a compact corpus **Time doesn't exist. And many other things (Big Bang, Black matter, Black holes,...)** Didier Viel,2017-11-20

What we call time in physics is not a real entity in the universe The real entities in the universe are matter and energy Energy gives motion to matter or allows the transformation of matter giving us the illusion of passing time or more precisely a perception of an arrow of time The mistake about using time as a real entity in physics came first in the 18th century when L Euler in 1752 states that acceleration of a body is the time derivative of velocity Instead we will use d Alembert definition of acceleration deduced by experimental results $\phi dt dv$ where dt is not time differential as in differential calculation but only a small constant of duration and ϕ the acceleration Einstein theory was to think that time is a real entity in the universe and then space time coordinates can describe the universe The Spacetime Origin of the

Universe Vladimir Ginzburg,2013-08-19 This book describes the basic concept of the Universal Spacetime Theory UST During its development I was stimulated by many scientific ideas proposed since the dawn of science that I described briefly in Chapter 1 In the UST these ideas took on a completely new form thanks to my discovery of a spiral string entity that I named the toryx The toryx turned out to be a perfect candidate for a prime element of nature This however was only the tip of the iceberg Besides yielding the unified laws applicable to both micro and macro worlds the toryx helped me to find the answer to the most puzzling question of science *Scientific Legacy Of Professor Zbigniew Oziewicz: Selected Papers From*

The International Conference "Applied Category Theory Graph-operad-logic" Hilda Maria Colin Garcia,Jose De Jesus Cruz Guzman,Louis H Kauffman,Hanna Makaruk,2023-09-27 Dedicated to the memory of the late Professor Zbigniew Oziewicz from Universidad Nacional Aut noma de M xico the book consists of papers on a wide variety of topics related to the work of Professor Oziewicz which were presented at the special conference on Graph Operads Logic GOL 2021 selected through peer review to promote his scientific legacy Professor Oziewicz was a great enthusiast and supporter of category theory and its applications in physics as well as in various areas of mathematics topology noncommutative geometry etc In particular he made significant contributions to the theory of Frobenius algebras which now are becoming more important due to their connection with topological quantum field theories that are used in mathematical physics and in quantum topology Professor Oziewicz was a great and very generous teacher who immersed his students in the beautiful ideas of category theory as well as mathematical physics and computation It was his idea to start a series of conferences under the title Graphs Operads

Logic most of them held in Mexico with some of them in the USA which were a great platform to discuss various ideas connected with category theory and its various applications and to make friends with other scientists Despite his passing the GOL 2021 conference is included in this series to pay tribute to his many contributions to diverse areas of science The book is laid out in twelve main topics where we can find relevant works from distinguished experts
