## Study Guide for Final Exam

There's a strict allocation of total points and so you should be able to find some time and effort (maybe 2-3 weeks) of intense but selective studying that will encompass the entire part, and ensure its great completion and understanding at the time of the exam. This includes doing practice problem questions, and identifying any areas that require special attention. You will take the first part using the knowledge you have, then use practice to see what you can do for the second part, and then use the knowledge you have to see what you can do for the third part, and so on.
