Programming With Higher Order Logic 1st Edition By Miller Dale Nadathur Gopalan 2012 Hardcover:

Programming with Higher-Order Logic Dale Miller, Gopalan Nadathur, 2012-06-11 A programming language based on a higher order logic provides a declarative approach to capturing computations involving types proofs and other syntactic structures Automated Deduction - CADE-20 Robert Nieuwenhuis, 2005-07-14 This book constitutes the refereed proceedings of the 20th International Conference on Automated Deduction CADE 20 held in Tallinn Estonia in July 2005 The 25 revised full papers and 5 system descriptions presented were carefully reviewed and selected from 78 submissions All current aspects of automated deduction are addressed ranging from theoretical and methodological issues to presentation and evaluation of theorem provers and logical reasoning systems **Automated Deduction, CADE ...**, 2005

Programming with Higher-Order Logic Professor Dale Miller, GUI, Gopalan Nadathur, 2014-05-14 Formal systems that describe computations over syntactic structures occur frequently in computer science Logic programming provides a natural framework for encoding and animating such systems However these systems often embody variable binding a notion that must be treated carefully at a computational level This book aims to show that a programming language based on a simply typed version of higher order logic provides an elegant declarative means for providing such a treatment Three broad topics are covered in pursuit of this goal First a proof theoretic framework that supports a general view of logic programming is identified Second an actual language called Lambda Prolog is developed by applying this view to higher order logic Finally a methodology for programming with specifications is exposed by showing how several computations over formal objects such as logical formulas functional programs and lambda terms and pi calculus expressions can be encoded in Lambda Prolog
