Good and Not Evil Is the Universe Randall T. Wert, 2025-10-30 George MacDonald was one of the most influential Christian thinkers of the nineteenth century and his writings continue to encourage and inspire readers to the present day. Good and Not Evil Is the Universe shares with readers the positive messages that pervade MacDonald's writing and the book does so in a way that demonstrates the consistency of his thought across many years and different genres. Contact, Variation, and Change in the History of English Simone E. Pfenninger, Olga Timofeeva, Anne-Christine Gardner, Alpo Honkapohja, Marianne Hundt, Daniel Schreier, 2014-09-11 The papers in this volume aim at facilitating exchange between three fields of inquiry that are of great importance in historical linguistics: language change, socio-linguistic research on variation, and contact linguistics. Drawing on a range of recently developed methodological innovations such as methods for quantifying the linguistic variation that is a prerequisite for language change or new corpus-based methods for investigating text type variation, the contributors are able to trace linguistic change in different periods and contact situations, demonstrate how variation occurs, and in how far language change results out of this variation. Thus, the chapters go beyond core issues of language variation and change, focusing on the boundary between word and grammar, discourse and ideology in the history of the English language.

The Rhetoric of Literary Communication Virginie Iché, Sandrine Sorlin, 2022-01-31 Building on the notion of fiction as communicative act, this collection brings together an interdisciplinary range of scholars to examine the evolving relationship between authors and readers in fictional works from 18th-century English novels through to contemporary digital fiction. The book showcases a diverse range of contributions from scholars in stylistics, rhetoric, pragmatics, and literary studies to offer new ways of looking at the author-reader channel, drawing on work from Roger Sell, Jean Jacques Lecercle, and James Phelan. The volume traces the evolution of its form across historical periods, genres, and media, from its origins in the conversational mode of direct address in 18th-century English novels to the use of second-person narratives in the 20th century through to 21st-century digital fiction with its implicit requirement for reader participation. The book engages in questions of how the author-reader channel is shaped by different forms and how this continues to evolve in emerging contemporary genres and of shifting ethics of author and reader involvement. This book will be of particular interest to students and scholars interested in the intersection of pragmatics, stylistics, and literary studies.

said in praise of poverty the fact remains that it is not possible to live a really complete or successful life unless one is rich No man can rise to his greatest possible height in talent or soul development unless he has plenty of money for to unfold the soul and to develop talent he must have many things to use and he cannot have these things unless he has money to buy them with Man develops in mind soul and body by making use of things and society is so organized that man must have money in order to become the possessor of things therefore the basis of all advancement for man must be the science of getting rich The object of all life is development and everything that lives has an inalienable right to all the development it is capable of attaining Man s right to life means his right to have the free and unrestricted use of all the things which may be necessary to his fullest mental spiritual and physical unfoldment or in other words his right to be rich In this book I shall not speak of riches in a figurative way to be really rich does not mean to be satisfied or contented with a little No man ought to be satisfied with a little if he is capable of using and enjoying more The purpose of Nature is the advancement and unfoldment of life and every man should have all that can contribute to the power elegance beauty and richness of life to be content with less is sinful **The Eclipses of John's Book of Revelation** Matko Utrobičić,2024-03-15 Who is the beast in

Dyson, 2019-07-04 Until recently a geologist was visualized by most people as a queer sort of fellow who went around the countryside breaking rocks with a little hammer Fortunately the general public today has a much clearer picture of the geologist and his science but there are still many among us who mistakenly feel that geology is something too remote for practical application Geology is the science of the Earth It includes a history of our planet starting with its origin and a history of the life that has lived upon it From it we can determine the reason for every feature of the landscape and every rock structure underneath the surface and we can further learn what processes gave rise to them

Threatened Masculinity from British Fiction to Cold War German Cinema Joseph Willis, 2019-05-30 The impact of the Cold War on German male identities can be seen in the nation's cinematic search for a masculine paradigm that rejected the fate centered value system of its National Socialist past while also recognizing that German males once again had become victims of fate and fatalism but now within the value system of the Soviet and American hegemonies that determined the fate of Cold War Germany and Central Europe This monograph is the first to demonstrate that this Cold War cinematic search sought out a meaningful masculine paradigm through film adaptations of late Victorian and Edwardian male writers who likewise sought a means of self determination within a hegemonic structure that often left few opportunities for personal agency In contrast to the scholarly practice of exploring categories of modern masculinity such as Victorian imperialist manliness or German Cold War male identity as distinct from each other this monograph offers an important comparative corrective that brings forward an extremely influential century long trajectory of threatened masculinity For German Cold War masculinity lessons were to be learned from history namely from late Victorian and Edwardian models of manliness Cold War Germans like the Victorians before them had to confront the unknowns of a new world without fear or hesitation In a Cold War mentality where nuclear technology and geographic distance had trumped face to face confrontation between East and West Cold War German masculinity sought alternatives to the insanity of mutual nuclear destruction by choosing not just to confront threats but to resolve threats directly through personal agency and self determination *How to Teach* Chris Curtis, 2019-07-17 Written by Chris Curtis *How to Teach English Novels* non fiction and their artful navigation is jam packed with enlivening ideas to help teachers make the subject of English more intellectually challenging for students and to make it fun too Never underestimate your duty and power as a teacher of English English teachers help students to think and feel They prompt them to reflect on their actions They hold a mirror to society and inspire students to see how they can make it better What other subject does that This insightful interpretation of what makes excellent secondary school English teaching is the work of a man whose humility fails to hide his brilliance and provides educators with a sophisticated yet simple framework upon which to hook their lessons Covering poetry grammar Shakespeare and how to teach writing Chris Curtis
