

# Company procurement policy

*Issued January 1, 2050*

---

The goal of this procurement policy is to provide a centralized process for requesting the purchase of a product or service for company or departmental use. In addition, this policy aims to streamline and compress the traditional RFX process to align and support company goals and values, while still providing the necessary due diligence with vendor selection.

## Procurement policy overview

---

### Pre-request requirements

All purchases must be approved by a department manager before the request is submitted through the online form. Each manager is responsible for adhering to their respective departmental budgets and must be able to track their spend throughout the year.

### Request submission

When a need for a new or replacement vendor is identified, submit a request for purchase to the procurement department using the intake form found [here](#). This form captures required details of the request and allows the procurement team to review the request and initiate the project.

### Procurement review

When the procurement team receives a new request, they will assess the information provided within three business days and will reach out with next steps.

Depending on the anticipated cost and complexity of the purchase, this may include a short requirements discovery workshop (usually 30 minutes or less). This Q&A session explores more details about product or service need, requirements for successful implementation and potential vendors for the solution. This step will also determine if the purchase requires an RFP or not.

### Vendor selection and contracting

If an RFP is not required or, after an RFP is issued, proposals and quotes from suitable vendors are reviewed. Next, procurement will lead pricing discussions, contractual negotiations and contract review. This part of the process includes a review and assessment of current incumbents, if any.

When a final vendor has been selected, procurement is responsible for routing any contractual documents for signatures, engaging with accounts payable to facilitate the transaction and entering any agreements into the procurement system of record.

Further, all agreements, whether an executable document, or online terms, will need to be reviewed and approved by Procurement before the purchase can be finalized.
