Programming As If People Mattered:

Programming as if People Mattered Nathaniel S. Borenstein, 2014-07-14 Through a set of lively anecdotes and essays Nathaniel Borenstein traces the divergence between the fields of software engineering and user centered software design and attempts to reconcile the needs of people in both camps Originally published in 1991 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

Planning as if People Matter Marc Brenman, Thomas W. Sanchez, 2012-08-16 American communities are changing fast ethnic minority populations are growing home ownership is falling the number of people per household is going up and salaries are going down According to Marc Brenman and Thomas W Sanchez the planning field is largely unprepared for these fundamental shifts If planners are going to adequately serve residents of diverse ages races and income levels they need to address basic issues of equity Planning as if People Matter offers practical solutions to make our communities more livable and more equitable for all residents While there are many books on environmental justice relatively few go beyond theory to give real world examples of how better planning can level inequities In contrast Planning as if People Matter is written expressly for planning practitioners public administrators policy makers activists and students who must directly confront these challenges It provides new insights about familiar topics such as stakeholder participation and civil rights And it addresses emerging issues including disaster response new technologies and equity metrics Far from an academic treatment Planning as if People Matter is rooted in hard data on the ground experience and current policy analysis In this tumultuous period of economic change there has never been a better time to reform the planning process Brenman and Sanchez point the way toward a more just social landscape

Agile and Iterative Development Craig Larman, 2004 This is the definitive guide for managers and students to agile and iterative development methods what they are how they work how to implement them and why they should

The Code Margaret O'Mara, 2019-07-09 One of New York Magazine's best books on Silicon Valley The true behind the scenes history of the people who built Silicon Valley and shaped Big Tech in America Long before Margaret O'Mara became one of our most consequential historians of the American led digital revolution she worked in the White House of Bill Clinton and Al Gore in the earliest days of the commercial Internet There she saw firsthand how deeply intertwined Silicon Valley was with the federal government and always had been and how shallow the common understanding of the secrets of the Valley's success actually was Now after almost five years of pioneering research O'Mara has produced the definitive history of Silicon Valley for our time the story of mavericks and visionaries but also of powerful institutions creating the framework for innovation from the Pentagon to Stanford University It is also a story of a community

that started off remarkably homogeneous and tight knit and stayed that way and whose belief in its own mythology has deepened into a collective hubris that has led to astonishing triumphs as well as devastating second order effects Deploying a wonderfully rich and diverse cast of protagonists from the justly famous to the unjustly obscure across four generations of explosive growth in the Valley from the forties to the present O Mara has wrestled one of the most fateful developments in modern American history into magnificent narrative form She is on the ground with all of the key tech companies chronicling the evolution in their offerings through each successive era and she has a profound fingertip feel for the politics of the sector and its relation to the larger cultural narrative about tech as it has evolved over the years Perhaps most impressive O Mara has penetrated the inner kingdom of tech venture capital firms the insular and still remarkably old boy world that became the cockpit of American capitalism and the crucible for bringing technological innovation to market or not The transformation of big tech into the engine room of the American economy and the nexus of so many of our hopes and dreams and increasingly our nightmares can be understood in Margaret O Mara s masterful hands as the story of one California valley As her majestic history makes clear its fate is the fate of us all

Why Humans Matter More Than Ever MIT Sloan Management Review,2019-08-20 Experts offer strategies for managing people in technocentric times In these technocentric times it is more important than ever to manage people well Companies employees and managers may feel overwhelmed by the never ending disruptions caused by new technologies This volume in the Digital Future of Management series shows why we should step back take stock and seize just a bit more control over how our world is evolving In Why Humans Matter More Than Ever management experts from both industry and academia offer strategies for managing people in our brave new digital world The contributors explain how new technologies even the most sophisticated artificial intelligence agents depend on human collaboration Companies need to develop rules principles and clear ethical guidelines that structure smart object human interactions Moreover in a world filled with technology distractions we must learn to how to manage our most valuable personal resource our attention Leaders need to step up to prepare their organizations for the evolution of work showing them how to adapt be more collaborative and learn new skills As virtual collaborations take place across professions locations and industries we must adopt the best practices in virtual communication Finally going beyond empathy and curiosity leaders should be self aware enough to remind themselves of what they may be missing even the best managers don t know everything Contributors Lynne Andersson Robert D Austin Catherine Bailey Kathryn M Bartol Daniel Han Ming Chng Chris DeBrusk Arati Deo Kishore Durg Lauren Eskreis Winkler Mallika Fernandes Ayelet Fishbach Fritz Fleischmann Kristen Getchell Bhaskar Ghosh Brad Gilbreath Rob Gleasure Sergey Gorbato Lynda Gratton N Sharon Hill Beth Humbert Bala Iyer Tae Yeol Kim Frieda Klotz Angela Lane Scott Latham Thomas W Malone Daniel McDuff Alain Pinsonneault Yasser Rahrovani Fabrizio Salvador Amanda Shantz Antti Tenhi l Jan vom Brocke Eoin Whelan [Creating Sustainable Community Programs](#) Mark R. Daniels,2001-02-28 Public opinion polls consistently reveal the lack of confidence disillusionment and mistrust that

citizens feel toward government Daniels and his contributors believe that the relationship between citizens and their governments can be changed by facilitating greater citizen collaboration with government particularly through local sustainable programs As the case studies show often sustainable community programs are created through grassroots movements that are initiated and managed by citizens themselves bringing them in contact with their local elected and appointed officials Unlike traditional programs that are administered by local officials on behalf of their citizens once sustainable community programs are created citizens administer their own programs in collaboration with local officials The case studies look at a variety of sustainable programs primarily in the United States that help to deal with issues such as recycling transportation microcredit site redevelopment pollution health care and hunger Creating Sustainable Community Programs is the first book on sustainable programs that is intended for an audience of public administration scholars researchers and students as well as practitioners who are searching for ways to change the relationship between citizens and their governments

Lean Architecture James O. Coplien, Gertrud Bjørnvig, 2011-01-06 More and more Agile projects are seeking architectural roots as they struggle with complexity and scale and they re seeking lightweight ways to do it Still seeking In this book the authors help you to find your own path Taking cues from Lean development they can help steer your project toward practices with longstanding track records Up front architecture Sure You can deliver an architecture as code that compiles and that concretely guides development without bogging it down in a mass of documents and guesses about the implementation Documentation Even a whiteboard diagram or a CRC card is documentation the goal isn t to avoid documentation but to document just the right things in just the right amount Process This all works within the frameworks of Scrum XP and other Agile approaches
