

Project Lead the Way (PLTW)

The PLTW middle and high school STEM education programs provide the inspiration for a new generation of innovators, the practical skills and hands-on experience to make students' knowledge count in the real world, and the basis for the next generation of leadership in the sciences, technology, engineering, and mathematics.

PLTW develops motivated, well-rounded students by instilling confidence, stressing the importance of self-discovery, encouraging innovative problem solving and critical thinking, teaching team building, and rewarding creativity.

Your student will develop skills essential for achievement in the classroom and success in college and at work. Additionally:

- PLTW students achieve significantly higher scores in reading, mathematics, and science.
- PLTW graduates earn higher GPA's as college freshmen.
- PLTW graduates are 5 to 10 times more likely to study STEM related fields.

Project Lead the Way is a non-profit organization focused on introducing and preparing high school students for Biomedical, engineering and technical careers of the future. PLTW forms partnerships with public schools, higher education institutions and the private sector to increase opportunities for students in engineering and technical fields. Particularly, PLTW provides a high rigor, project-based curriculum meeting national science and math standards, professional development for teachers and guidance counselors and a comprehensive national support network. PLTW courses are accessible to ALL students, and the initial biomedical courses expose students to multiple career options in the biomedical arena. All of the courses are based on problem-solving, teamwork, communication and leadership as the students also build the math, science and technology skills to prepare for and succeed in tomorrow's careers.

Students are eligible for college credit for all four PLTW Biomedical Sciences courses and IED, POE, and DE in the PLTW Engineering program. (For Biomedical Sciences courses, please see Science Curriculum portion of this handbook).

Ginevri, 2012-05-09 Helpful to those tasked with managing complex environments *Projects and Complexity* introduces a new way of looking at projects and fostering the culture needed to achieve sustainable results. It brings together experts from the academic, military, and business worlds to explore project management in the context of complexity theory and organization.

De Gruyter Handbook of Responsible Project Management Beverly L. Pasian, Nigel L. Williams, 2023-01-30 The narrative about the project management profession is dominated by discussions of success and failure along with the need to improve the competence of project managers. As a result, the community is engaged in a fruitless search for a combination of tools, techniques, and practices that will result in desired outcomes for funders. While the profession has made recent attempts to incorporate environmental and social responsibility, these areas are still framed within the existing discourses of project delivery. The *De Gruyter Handbook of Responsible Project Management* seeks to rethink project management by integrating contributions from the emerging responsible Management domain. This handbook will explore the nature and extent of project professionals' responsibility at different levels: individual, team, organizational, and societal, along with the implications for education, research, and practice. The *De Gruyter Handbook of Responsible Project Management* offers cutting-edge insights into the field of project management. It is an essential reference for scholars and practitioners.
