*Multinational Enterprises and the Law* Peter T. Muchlinski, 2010      *Multinational Enterprises and the Law* Peter Muchlinski, 2007

*Multinational Enterprises and the Law* presents the only comprehensive contemporary and interdisciplinary account of the various techniques used to regulate multinational enterprises (MNEs) at the national, regional, and multilateral levels. In addition, it considers the effects of corporate self-regulation upon the development of the legal order in this area. Split into four parts, the book firstly deals with the conceptual basis for MNE regulation, explaining the growth of MNEs, their business and legal forms, the relationship between them, and the effects of a globalising economy and society upon the evolution of regulatory agendas in the field. Part II covers the main areas of economic regulation, including the limits of national and regional jurisdiction over MNE activities, controls, and liberalization of entry and establishment, tax, and company and competition law. Part III introduces the social dimension of MNE regulation, covering labour rights, human rights, and environmental issues, and Part IV deals with the contribution of international law and organizations to MNE regulation and to the control of investment risks, covering the main provisions found in international investment agreements and their recent interpretation by international tribunals.

*Energy Law and the Sustainable Company* Patricia Park, Duncan Magnus Park, 2016-04-28

What kind of decision making should multinationals engage in to create a sustainable company? There is substantial debate over why CEOs, senior management, and Boards of Directors make the wrong decisions by not asking the right questions, with the result that not only is the company itself damaged but all of the stakeholders find themselves at a detriment. Focusing on innovation, technology transfer, and the use of intangible assets, *Energy Law and the Sustainable Company* features case studies from the oil and gas sector to illustrate how to develop a sustainable business. Considering corporate social responsibility from the perspective of international and national law, the book demonstrates how companies can be both profitable and ethical, using the influences of psychology to encourage senior decision makers to make the right decisions. It was revealed that reputation was the main principle influencing decision making. The book also discusses how companies have reported on their sustainability strategy and considers how technology transfer and intangible assets may play a part in addressing global sustainability. This book should be invaluable reading to students and scholars of Sustainable Business, Business Law, Corporate Social Responsibility, Environmental and Energy Law, as well as Environmental and Energy Management.

***Asian Yearbook of International Law, 1997*** Ko Swan Sik, Surya Subedi, M. C. W. Pinto, 2001-03-01

**Gender, Law and Justice in a Global Market** Ann Stewart, 2011-08-25 Theories of gender justice in the twenty first century must engage with global economic and social processes Using concepts from economic analysis associated with global commodity chains and feminist ethics of care Ann Stewart considers the way in which gender contracts relating to work and care contribute to gender inequalities worldwide She explores how economies in the global north stimulate desires and create deficits in care and belonging which are met through transnational movements and traces the way in which transnational economic processes discourses of rights and care create relationships between global south and north African women produce fruit and flowers for European consumption body workers migrate to meet deficits in affect through provision of care and sex British Asian families seek belonging through transnational marriages

Legal treatment standards for international investments. Heuristic aspects Cristina-Elena Popa Tache, 2021-06-18 Discussing the standards of legal treatment for international investment means subjecting the law branch in its entirety to research Representing the most comprehensive part of particular importance for international investment law treatment standards continue to generate a series of differentiations whose understanding and approach often require the analysis of the starting points that led to the emergence by division of this branch of law International investment treatment standards represent or should represent the direct effect of the principles of international investment law thus being their expression with a pronounced logical affinity between them Specifically they are not confused with the principles but they are the practical reflection at the level of rights and obligations applicable to the performers in this field in the highlight of the theoretical practical aspect having a customary origin as well as the principles underlying their development Following this logic and analyzing the situation of the latest investment treaties it turns out that there is an insufficiency in the preponderance of treatment standards compared to the principles much more numerous and constantly expanding of this field of law The specificity of this branch of law consists in the emphasis on its fundamental concepts essentializing what determines the whole being considered as a science of essentialization and ultimately the role of any method of scientific research is to analyze discover and highlight what this branch of law represents as a whole what

determines it the connections of this ensemble with other sciences the composition and structuring of the system and the substantiation of the connections between its components The standards of legal treatment of international investments settled with the individualization of international investment law Their appearance took place gradually depending on the path marked by the stages of emergence and evolution of the legal regime of foreign investment from the legal phenomenon to the branch of law from trade in general to foreign investment in particular In all of this legal scientific research plays a key role because any codification activity must be scientifically substantiated Any codification policy must ensure a balance between the diachrony and the synchrony of international investment law between the dynamics and the statics of this law A complete analysis of the treatment standards of international investments can be performed only by a close correlation because the singular existence of a standard specific to this field is excluded from the start The importance of establishing and existence of eloquent and integrated treatment standards is a condition for survival under international economic crises The main feature of this monograph is to present the subject in a way that is as easy to understand as possible to study and apply such rules being a very useful and valuable material for students masters doctoral students theoreticians and practitioners

**International Legal Materials** ,2007-05      **The Routledge Handbook of Environmental Justice** Ryan Holifield,Jayajit Chakraborty,Gordon Walker,2017-09-14 The Routledge Handbook of Environmental Justice presents an extensive and cutting edge introduction to the diverse rapidly growing body of research on pressing issues of environmental justice and injustice With wide ranging discussion of current debates controversies and questions in the history theory and methods of environmental justice research contributed by over 90 leading social scientists natural scientists humanists and scholars from professional disciplines from six continents it is an essential resource both for newcomers to this research and for experienced scholars and practitioners The chapters of this volume examine the roots of environmental justice activism lay out and assess key theories and approaches and consider the many different substantive issues that have been the subject of activism empirical research and policy development throughout the world The Handbook features critical reviews of quantitative qualitative and mixed methodological approaches and explicitly addresses interdisciplinarity transdisciplinarity and engaged research Instead of adopting a narrow regional focus it tackles substantive issues and presents perspectives from political and cultural systems across the world as well as addressing activism for environmental justice at the global scale Its chapters do not simply review the state of the art but also propose new conceptual frameworks and directions for research policy and practice Providing detailed but accessible overviews of the complex varied dimensions of environmental justice and injustice the Handbook is an essential guide and reference not only for researchers engaged with environmental justice but also for undergraduate and graduate teaching and for policymakers and activists

*Sustainable Ocean Resource Governance* Markus Kotzur,Nele Matz-Lück,Alexander Proelss,Roda Verheyen,Joachim Sanden,2018-01-03 In Sustainable Ocean Resource Governance an international group of eminent authors offer perspectives on the legal interface between

sustainable economic growth effective marine resource management and urgent environmental protection of the sea by addressing three key issues deep sea mining marine energy generation and seabed pipeline and cable systems In light of the sectoral nature of current ocean governance and the existing patchwork of management arrangements for the oceans this book gives insights in search for a coherent and consistent sustainability approach The Multinational Enterprise and Legal Control Cynthia Day Wallace, 2002-04-02 This long awaited new book from Cynthia Day Wallace picks up the thread of her best selling Legal Control of the Multinational Enterprise National Regulatory Techniques and the Prospects for International Controls In the present work she applies herself to legal and pragmatic aspects of control surrounding MNE operations The primary focus is on legal and administrative techniques and measures practised by host states to control transparently or less so foreign MNE activity within their territories or even extraterritorially when effects are felt within national boundaries The primary geographic focus is the six most investment intensive industrialized states namely Canada France Germany Japan the United States and the United Kingdom At the same time an important message of the present study is precisely the implication for the developing countries as well as for the emerging market economies of central and eastern Europe and even Asian nations besides Japan because it is the sharing of this very experience of years that can best serve to facilitate a fuller participation on the part of the up and coming economies in the same global market place
