with arts and design creation and studies **Microphone Techniques in Stereo and Surround Recording** Adam Rosiński, 2022-11-22 Sound engineering is one of the fastest growing branches of music production The need for a broad based discussion on the issues constituting the art of sound engineering persists and loses none of its relevance revealing that sound engineering should not be investigated only in the mathematical and physical context musical acoustics or the engineering aspect signal processing and modification Publications targeted primarily at musicians are few and far between which is why the mutual understanding for different priorities which effectively concern the same issues faced by the engineer the acoustician and the musician seems to be a complex problem and the main concept explored in this publication This book is intended for musicians or sound directors but also acousticians and sound engineers wishing to learn how the musicians think The monograph is also addressed to musicians who intend to record their material in the studio in the near future but do not possess knowledge on studio construction studio workflow or the art of recording It seems important to familiarize the musicians with the reality that awaits them on the other side of the glass thus fostering their responsibility for the work jointly produced by them entering the studio and the sound director The Child as Musician Gary McPherson, 2015 The new edition of The Child as Musician celebrates the richness and diversity of the many different ways in which children can engage in and interact with music It presents theory both cutting edge and classic in an accessible way for readers by surveying research concerned with the development and acquisition of musical skills **Music, Technology, Innovation** Carol Johnson, Andrew King, 2024-12-03 Music Technology Innovation Industry and Educational Perspectives draws upon cutting edge practice in the use of technology from both a pedagogical and industry perspective Situated within the latest research this edited volume explores technological innovation from a musical perspective examines current trends within the industry and carefully considers them from an educational perspective Noted throughout history music education is responsive to industry innovations However emerging technologies often begin with over hyped promises before they move through various phases of development and are then repurposed for learning and teaching Educators can adopt an innovation and develop a framework that is pedagogically sound and learner centred Based on these ideas the authors together highlight industry innovations that have potential outcomes for engaging students in music learning within research informed practices build upon these ideas and identify proactive mechanisms for teaching music education and work towards developing a framework for understanding these phenomena The chapters address key topics including the ethics of technology AI and music online performance and teaching gamification big data teaching audio production acoustic ecology and more The examination of areas in contemporary innovation can further support the potential to empower teachers and students to understand the opportunities for teaching sustainability and growth in music education Creative and Critical Projects in Classroom Music John Finney, Chris Philpott, Gary Spruce, 2020-10-29 Creative and Critical Projects in Classroom Music is both a celebration and extension of John Paynter and Peter Aston s groundbreaking work on creative classroom

music Sound and Silence first published in 1970 Building on the central themes of the original work the child as artist the role of musical imagination and creativity and the process of making music the authors and contributors provide a contemporary response to the spirit and style of Sound and Silence They offer reflections on the ideas and convictions underpinning Paynter and Aston s work in light of scholarship developed during the intervening years This critical work is accompanied by 16 creative classroom projects designed and enacted by contemporary practitioners raising questions about the nature and function of music in education and society In summary this book aims to Celebrate seminal work on musical creativity in the classroom Promote the integration of practical critical and analytical writing and thinking around this key theme for music education Contribute to initiating the next 50 years of thought in relation to music creativity in the classroom Offering a unique combination of critical scholarship and practical application and published on the occasion of the 50th anniversary of Sound and Silence themes from Paynter and Aston s work are here given fresh context that aims to inspire a new generation of innovative classroom practice and to challenge current ways of thinking about the music classroom

Who's Who in Research: Performing Arts Intellect Books,2013-01-01 Increasingly academic communities transcend national boundaries Collaboration between researchers across space is clearly increasing as well as being increasingly sought after noted the online magazine Inside Higher Ed in a recent article about research in the social sciences and humanities Even for those scholars who don t work directly with international colleagues staying up to date and relevant requires keeping up with international currents of thought in one s field But when one s colleagues span the globe it s not always easy to keep track of who s who or what kind of research they re conducting That s where Intellect s new series comes in A set of worldwide guides to leading academics and their work across the arts and humanities Who s Who in Research features comprehensive profiles of scholars in the areas of cultural studies film studies media studies performing arts and visual arts Who s Who in Research Performing Arts includes concise yet detailed listings include each academic s name institution biography and current research interests as well as bibliographic information and a list of articles published in Intellect journals The volumes in the Who s Who in Research series will be updated each year providing the most current information on the foremost thinkers in academia and making them an invaluable resource for scholars hiring committees academic libraries and would be collaborators across the arts and humanities

Theory and Practice of Technology-Based Music Instruction Jay Dorfman,2022-01-14 Technology is an increasingly popular part of music education in schools that attracts students to school music who might not otherwise be involved In many teacher preparation programs music technology is an afterthought that does not receive the same extensive treatment as do traditional areas of music teaching such as band orchestra choir and general music This book helps to establish a theoretical and practical foundation for how to teach students to use technology as the major means for developing their musicianship Including discussions of lesson planning lesson delivery and assessment readers will learn how to gain comfort in the music technology lab Theory and

Practice of Technology Based Music Instruction also includes profiles of practice that dive into the experiences of real teachers in music technology classes their struggles their successes and lessons we can learn from both In this second edition new profiles feature Teachers of Color who use technology extensively in their varied types of music teaching This edition encourages readers to think about issues of inequity of social justice in music education technology and how teachers might begin to address those concerns Also updated are sections about new standards that may guide music education technology practice about distance and technology enhanced learning during the global pandemic and about ways to integrate technology in emerging contexts
