GENERAL LUBRICATIONS

Lubricate every 2 months (1,000 mi., 800 km).

Proper lubrication is important for smooth operation and long life of each working part of your vehicle and also for safe riding. It is a good practice to lubricate the machine after every rough ride and after getting it wet in the rain or after washing it. Major lubrication points are indicated below.

- * Lubricate exposed parts which are subject to rust with motor oil grease.
- * Before lubricating each part, clean off any rusty scale and wipe off old grease, oil, dirt or grime.

WARNING

Be careful not to apply too much grease to the brake disc. If grease gets on the disc, brake stop power will weaken.
