Intuition, Trust, and Analytics Jay Liebowitz, Joanna Paliszkievicz, Jerzy Gołuchowski, 2017-10-25 In order to make informed decisions there are three important elements intuition trust and analytics Intuition is based on experiential learning and recent research has shown that those who rely on their gut feelings may do better than those who don't Analytics however are important in a data driven environment to also inform decision making The third element trust is critical for knowledge sharing to take place These three elements intuition analytics and trust make a perfect combination for decision making This book gathers leading researchers who explore the role of these three elements in the process of decision making

Analytics and Intuition in the Process of Selecting Talent Jürgen Deters, 2022-11-07 Human decisions especially in management and personnel selection are based on making judgments about people analytically and intuitively Yet in business and scientific contexts judgments are expected to be based on a rational analysis rather than intuitions or emotions Intuition is often seen as something mystical that should not be trusted and thus eliminated from human decision making Our empirical and theoretical research shows that this is impossible when people are dealing with people Instead intuitions and emotions have significant power in the decision making process Neuroscience even shows that humans are incapable of switching off their emotions or intuitions when making decisions Therefore intuition and emotions as evolutionary achievements of human beings should be looked at more closely to use the wisdom they offer This book provides an insight into the current state of research on rational analytical procedures in personnel selection and complements this with research on intuitions and emotions in personnel diagnostics By integrating scientifically verifiable rational analytical decision making procedures with the inner experiential knowledge of people this book bridges two complementary ways of recognizing and making good decisions It demonstrates how intuitions are developed and used in different fields of practice and cultures and how scientific research results from rational analytical and intuitive emotional selection procedures are successfully integrated by practitioners
