Following the general series format, the book opens with the series foreword and a chronology of key events in Taiwan's history. Eleven chapters follow, with half of the book focusing on the modern historic events that occurred post World War II. Chapters examine topics and eras including Pre-history and Early Civilization to 1100, Formosa, The Dutch Colony, 1622-1662, Cold War, Island Conflicts and Control, 1950-1972, and Democratization and Independence Movement, 1996-2004. A glossary of terms and annotated bibliography rounds out the work, making it an ideal resource for high school and undergraduate students, as well as general readers who are looking for an introduction to Taiwan's history.

Urbanization and Party Survival in China Xiaobing Li, Xiansheng Tian, 2016-11-21. While the Chinese urban movement has successfully transferred surplus labor from the countryside to urban industries that urgently require free and cheap labor, numerous problems have arisen as a

result of the unprecedented huge scale process. Such conditions such as overcrowding, substandard housing, lack of social services, corruption, and abuse of power have often reached crisis stage. American college students often ask: How does the government control the largest urban population in the world? Why do newly developed, highly commercialized cities continue to support the Chinese Communist Party (CCP) rather than challenging the old regime? What happens when urban residents have problems with a party-controlled government? This book collects essays from the best scholars in their fields and examines urban issues including identifying residents' concerns, analyzing policy problems, and providing some answers to these pivotal questions. They address this important topic from a Chinese American perspective through a cooperative interdisciplinary research effort among Chinese American scholars interested in the subject. Their scholarship makes a significant contribution through multi-faceted components from different fields such as economics, political science, criminal justice, law, anthropology, sociology, and education. The authors introduce and explore the theory and practice of policy patterns, political systems, and social institutions by identifying key issues in Chinese government and society contained within the larger framework of the international sphere. Originally from Beijing, Shanghai, Xi'an, Tianjin, and other cities in China, these authors have received training and advanced degrees from American universities and colleges, thus bringing uncommon perspective and conclusions by focusing on urban studies specific to China. Their endeavors move beyond the existing scholarship and seek to spark new debates and proposed solutions while reflecting on established schools of history, religion, linguistics, and gender studies. Crucial to this volume is the assessment of historical and empirical data found in these essays that place major events in the context of Chinese tradition, its culture, and national security. Using comprehensive coverage to create a broad and solid foundation of knowledge, this collection presents a better understanding of the current Chinese metropolitan climate and includes legitimate issues with city policy implementation.

Other Geographies Sharad Chari, Susanne Freidberg, Vinay Gidwani, Jesse Ribot, Wendy Wolford, 2017-10-02. An international group of distinguished scholars pay homage to and build on the work of one of the most influential thinkers of our time, Michael Watts. Shows how Michael Watts' research, writings, teaching, and mentoring have relentlessly pushed boundaries, transforming his chosen field of geography and beyond. Spans an array of topics including the political economy and ecology of African societies, governmentality and territoriality in various Southern contexts, food security, cultural materialist expositions of capitalism, modernity and development across the postcolonial world. Builds on his legacy, exploring its theoretical, analytical, and empirical implications, and proposing exciting new possibilities for further exploration in the tracks of Watts.

Material Politics Andrew Barry, 2013-09-23 In Material Politics author Andrew Barry reveals that as we are beginning to attend to the importance of materials in political life materials has become increasingly bound up with the production of information about their performance origins and impact Presents an original theoretical approach to political geography by revealing the paradoxical relationship between materials and politics Explores how political disputes have come to revolve not around objects in isolation but objects that are entangled in ever growing quantities of information about their performance origins and impact Studies the example of the Baku Tbilisi Ceyhan oil pipeline a fascinating experiment in transparency and corporate social responsibility and its wide spread negative political impact Capitalizes on the growing interdisciplinary interest especially within geography and social theory about the critical role of material artefacts in political life
