Teaching the Middle Ages through Modern Games Robert Houghton,2022-10-24 Games can act as invaluable tools for the teaching of the Middle Ages The learning potential of physical and digital games is increasingly undeniable at every level of historical study These games can provide a foundation of information through their stories and worlds They can foster understanding of complex systems through their mechanics and rules Their very nature requires the player to learn to progress The educational power of games is particularly potent within the study of the Middle Ages These games act as the first or most substantial introduction to the period for many students and can strongly influence their understanding of the era Within the classroom they can be deployed to introduce new and alien themes to students typically unfamiliar with the subject matter swiftly and effectively They can foster an interest in and understanding of the medieval world through various innovative means and hence act as a key educational tool This volume presents a series of essays addressing the practical use of games of all varieties as teaching tools within Medieval Studies and related fields In doing so it provides examples of the use of games at pre university undergraduate and postgraduate levels of study and considers the application of commercial games development of bespoke historical games use of game design as a learning process and use of games outside the classroom As such the book is a flexible and diverse pedagogical resource and its methods may be readily adapted to the teaching of different medieval themes or other periods of history      Teaching of Rights and Justice in the Law School Stephen Hurley,Chris Monaghan,2025-03-04 This book examines the challenges of bringing cutting edge research in often controversial areas into the law syllabus and explores how academics can effectively adopt a holistic approach to research and pedagogy when teaching rights and justice The collection brings together experts from all areas of legal

scholarship to discuss how they fuse often controversial aspects of rights and justice into their teaching in a way that responds to and is ultimately led by academic research. As such, it advances legal education through the opportunity to explore the interplay between rights and justice and how scholars both ensure that their teaching is research led whilst responding to the needs and views of students and issues such as generational differences in viewpoints on controversial issues. This topical volume will appeal to academics and researchers interested in academic freedom, the challenges of research led teaching and the pedagogy around the teaching of rights and justice.
