Tauber, 2012-12-06 The tension between art and science may be traced back to the Greeks What became natural philosophy and later science has traditionally been posed as a fundamental alternative to poetry and art It is a theme that has commanded central attention in Western thought as it captures the ancient conflict of Apollo and Dionysus over what deserves to order our thought and serve as the aspiration of our cultural efforts The modern schism between art and science was again clearly articulated in the Romantic period and seemingly grew to a crescendo fifty years ago as a result of the debate concerning atomic power The discussion has not abated in the physical sciences and in fact has dramatically expanded most prominently into the domains of ecology and medicine Issues concerning the role of science in modern society although heavily political must be regarded at heart as deeply embedded in our cultural values Although each generation addresses them anew the philosophical problems which lay at the foundation of these fundamental concerns always appear fresh and difficult This anthology of original essays considers how science might have a greater commonality with art than was perhaps realized in a more positivist era The contributors are concerned with how the aesthetic participates in science both as a factor in constructing theory and influencing practice The collection is thus no less than a spectrum of how Beauty

and Science might be regarded through the same prism **The Photographic News** ,1875 **The British Journal of Photography** ,1881 **Anthony's Photographic Bulletin for** ,1887 **The Photographic Times** ,1889
