Asai,S. Takashima,P.R. Edwards,1993-12-31 This book provides an overview of advanced manufacturing technology in Japan It describes the prevalent manufacturing engineering concepts and highlights the current applications technologies and systems in Japanese manufacturing industry *Proceedings of the First Annual International Robot Conference* ,1983 Ultratech ,1986

Flexible Automation in Japan J. Hartley,2013-04-09 Much has been said and written about Japan's manufacturing prowess Most of the comment comes from people who are merely visitors to the country and can be best classified as observers looking in from the outside Other views come from the Japanese themselves in which the double barrier of culture and language filters out much information that would be of real value to Western industrialists Neither of these limitations apply to John Hartley who has been resident in Japan for the past five years He understands the culture can speak the language and has extensive contacts at the highest level Therefore he is in a unique position to report on the Japanese scene and its activities in advanced manufacturing technology This he has been doing on a regular basis to IFS magazines The Industrial Robot Assembly Automation Sensor Review and The FMS Magazine Most of the material in this book is from John Hartley's pen and represents his most significant contributions on flexible automation in Japan to these journals over the last three years It is augmented with a few other articles written by leading authorities on new technology in Japanese manufacturing industry Robotics Product Database ,1988 The International Robot Industry Report John Mortimer,Brian Rooks,2013-04-17 Like many other new technologies which have since been seized and exploited by others

the industrial robot is a British invention In 1957 a patent was produced by a British inventor Cyril Walter Kenward and later it became crucial to the future of robotics For across the Atlantic two robot builders Unimation and AMF both infringed this patent and ultimately a cash settlement was made to Kenward The owner of Unimation Inc was Joseph Engelberger an entrepreneur and avid reader of Isaac Asimov the writer who helped to create the image of the benevolent robot It is claimed that Engelberger s journey of fame down the road which led to him being hailed as the father of robotics can be traced to the day that he met George C Devol at a cocktail party Devol was an inventor with an impressive list of patents to his name in the electronics field One of Devol s patent applications referred to a Programmed Transfer Article Devol s patent was issued in 1961 as US Patent 2 988 237 and this formed the basis of the Unimate robot which first saw the light of day in 1960 The first Unimate was sold to Ford Motor Company which used it to tend a die casting machine It is perhaps ironic that the first robot was used by a company which refused to recognise the machine as a robot preferring instead to call it a Universal Transfer Device
