Department of the Army, 1977 Scientific and Technical Aerospace Reports , 1991 Monthly Catalog of United States Government Publications , 1994 *Bootstrapping* Thierry Bardini, 2000-12-01 Bootstrapping analyzes the genesis of personal computing from both technological and social perspectives through a close study of the pathbreaking work of one researcher Douglas Engelbart In his lab at the Stanford Research Institute in the 1960s Engelbart along with a small team of researchers developed some of the cornerstones of personal computing as we know it including the mouse the windowed user interface and hypertext Today all these technologies are well known even taken for granted but the assumptions and motivations behind their invention are not Bootstrapping establishes Douglas Engelbart s contribution through a detailed history of both the material and the symbolic constitution of his system s human computer interface in the context of the computer research community in the United States in the 1960s and 1970s Engelbart felt that the complexity of many of the world s problems was becoming overwhelming and the time for solving these problems was becoming shorter and shorter What was needed he determined was a system that would augment human intelligence co transforming or co evolving both humans and the machines they use He sought a systematic way to think and organize this coevolution in an effort to discover a path on which a radical technological improvement could lead to a radical improvement in how to make people work

effectively What was involved in Engelbart s project was not just the invention of a computerized system that would enable humans acting together to manage complexity but the invention of a new kind of human the user What he ultimately envisioned was a bootstrapping process by which those who actually invented the hardware and software of this new system would simultaneously reinvent the human in a new form The book also offers a careful narrative of the collapse of Engelbart s laboratory at Stanford Research Institute and the further translation of Engelbart s vision It shows that Engelbart s ultimate goal of coevolution came to be translated in terms of technological progress and human adaptation to supposedly user friendly technologies At a time of the massive diffusion of the World Wide Web Bootstrapping recalls the early experiments and original ideals that led to today s information revolution
