The Smart Neanderthal Clive Finlayson, 2019-02-14 Since the late 1980s the dominant theory of human origins has been that a cognitive revolution c. 50 000 years ago led to the advent of our species *Homo sapiens*. As a result of this revolution our species spread and eventually replaced all existing archaic *Homo* species ultimately leading to the superiority of modern humans. Or so we thought. As Clive Finlayson explains, the latest advances in genetics prove that there was significant interbreeding between Modern Humans and the Neanderthals. All non-Africans today carry some Neanderthal genes. We have also discovered aspects of Neanderthal behaviour that indicate that they were not cognitively inferior to modern humans as we once thought and in fact had their own rituals and art. Finlayson, who is at the forefront of this research, recounts the discoveries of his team providing evidence that Neanderthals caught birds of prey and used their feathers for symbolic purposes. There is also evidence that Neanderthals practised other forms of art as the recently discovered engravings in Gorham's Cave, Gibraltar, indicate. Linking all the recent evidence, *The Smart Neanderthal* casts a new light on the Neanderthals and the Cognitive Revolution. Finlayson argues that there was no revolution and instead modern behaviour arose gradually and independently among different populations of Modern Humans and Neanderthals. Some practices were even adopted by Modern Humans from the Neanderthals. Finlayson overturns classic narratives of human origins and raises important questions about who we really are.

The Naked Neanderthal Ludovic Slimak, 2024-02-06 A riveting scientific journey exploring the enigma of the Neanderthal and the species' unique form of intelligence. What do we really know about our cousins, the Neanderthals? For over a century we saw Neanderthals as inferior to *Homo sapiens*. More recently the pendulum swung the other way and they are generally seen as our relatives, not quite human but similar enough and still not equal. Now thanks to an ongoing revolution in palaeoanthropology in which he has played a key part, Ludovic Slimak shows us that they are something altogether different and they should be understood on their own terms rather than by comparing them to ourselves. As he reveals in this stunning book, the Neanderthals had their own history, their own rituals, their own customs. Their own intelligence, very different from ours. Slimak has travelled around the world for the past thirty years to uncover who the Neanderthals really were. A modern-day Indiana Jones, he takes us on a fascinating archaeological investigation from the Arctic Circle to the deep Mediterranean forests, he traces the steps of these enigmatic creatures working to decipher their real stories through every single detail they left behind. A thought-provoking adventure story written with wit and verve. *The Naked Neanderthal* shifts our understanding of deep history and in the process reveals just how much we have yet to learn.

The Neanderthal Legacy Stan Gooch, 2008-04-18 A direct appeal for a revolution in our educational system to restore the connection with our Neanderthal heritage. Examines the genetic evidence for Neanderthal *Cro-Magnon* crossbreeding and the dual nature effects this hybrid cross produced. Explains the influence of the Neanderthal's enlarged cerebellum on our modern brain function and psychic and paranormal abilities. In *The Neanderthal Legacy*

eminent psychologist and paranormal researcher Stan Gooch brings together the wide ranging investigative strands of his lifetime of study of the human brain One of the world s leading experts on the influence of Neanderthal Man on the cultural and biological development of humanity Gooch contends that the Neanderthals enlarged cerebellum was a source of deep connection with the psychic and dream worlds which remains extant in modern man in paranormal phenomena that conventional science cannot explain Gooch offers new scientific evidence of the crossbreeding between Neanderthals and Cro Magnons that is responsible for the dichotomous nature of our feelings thoughts impressions beliefs and even our cultural mores and politics The hybrid vigor produced by this mating has gifted modern man with abilities and sensibilities that the scientific establishment and conventional educational system entirely ignore The author explores the legacy of our Neanderthal ancestors in an effort to awaken their virtues and qualities which are so needed in our modern world
