Nature Inspired Cooperative Strategies for Optimization (NICSO 2010) Carlos Cruz, Juan R. González, David Alejandro Pelta, Natalio Krasnogor, Germán Terrazas, 2010-04-07 Many aspects of Nature Biology or even from Society have become part of the techniques and algorithms used in computer science or they have been used to enhance or hybridize several techniques through the inclusion of advanced evolution cooperation or biologically based additions The previous NICSO workshops were held in Granada Spain 2006 Acireale Italy 2007 and in Tenerife Spain 2008 As in the previous editions NICSO 2010 held in Granada Spain was conceived as a forum for the latest ideas and the state of the art research related to nature inspired cooperative strategies The contributions collected in this book cover topics including nature inspired techniques like Genetic Algorithms Evolutionary Algorithms Ant and Bee Colonies Swarm Intelligence approaches Neural Networks several Cooperation Models Structures and Strategies Agents Models Social Interactions as well as new algorithms based on the behaviour of fireflies or bats *Proceedings of the 1st International Conference on Innovation in Information Technology and Business (ICIITB 2022)* Nebojsa Bacanin, Hothefa Shaker, 2023-02-10 This is an open access book The First International Conference on Innovation in information technology and business ICIITB will be taking place in Muscat Oman on November 9th and 10th 2022 The Conference will be carried out in a hybrid format allowing world scattered academicians researchers and industry professionals to participate in this unique Conference for Oman and the GCC region The participants of the Conference will get an opportunity to contribute to the contemporary implementation of cutting edge research and development in the area of artificial intelligence data science machine learning and the IoT in the business environment The participants will get a first of a kind networking and knowledge sharing opportunity to be a part of an event in Oman that will gather recognized researchers from the GCC Europe the USA and other parts of the World Select research papers will also be published in a Springer published Conference proceedings [Proceedings of the Future Technologies Conference \(FTC\) 2023, Volume 4](#) Kohei Arai, 2023-11-07 This book is a collection of thoroughly well researched studies presented at the Eighth Future Technologies Conference This annual conference aims to seek submissions from the wide arena of studies like Computing Communication Machine Vision Artificial Intelligence Ambient Intelligence Security and e Learning With an impressive 490 paper submissions FTC emerged as a hybrid event of unparalleled success where visionary minds explored groundbreaking solutions to the most pressing challenges across diverse fields These groundbreaking findings open a window for vital conversation on information technologies in our community especially to foster future collaboration with one another We hope that the readers find this book interesting and inspiring and render their enthusiastic support toward it [Condensed-Matter-Principia Based Information & Statistical Measures](#) Adam Gadomski, Sylwia Zielińska-Raczyńska, 2021-01-20 This book summarizes the efforts of ten papers collected

by the Special Issue Condensed Matter Principia Based Information Werner Ebeling Berlin ought to be highlighted In light of this a development of his research as it has moved from statistical thermodynamics to solid state theory pursued in terms of nonlinear solid state optics Franco Bassani Pisa and culminated very recently with large quasiparticles termed Rydberg excitons and their coherent interactions with light is worth delineating Designing Scientific Applications on GPUs Raphael Couturier,2013-11-21 Many of today s complex scientific applications now require a vast amount of computational power General purpose graphics processing units GPGPUs enable researchers in a variety of fields to benefit from the computational power of all the cores available inside graphics cards Understand the Benefits of Using GPUs for Many Scientific Applications **Proceedings of the 12th International Conference on Soft Computing for Problem Solving** Millie Pant,Kusum Deep,Atulya Nagar,2024-07-22 This book provides an insight into 12th International Conference on Soft Computing for Problem Solving SocProS 2023 organized by The Department of Applied Mathematics and Scientific Computing Saharanpur Campus of Indian Institute of Technology Roorkee India in conjunction with Continuing Education Center during 11 13 August 2023 This book presents the latest achievements and innovations in the interdisciplinary areas of soft computing machine learning and data science It covers original research papers in the areas of algorithms artificial neural network deep learning statistical methods genetic algorithm and particle swarm optimization and applications data mining and clustering computer vision medical and health care finance data envelopment analysis business and forecasting applications This book is beneficial for young as well as experienced researchers dealing across complex and intricate real world problems for which finding a solution by traditional methods is a difficult task *Artificial Chemistries* Wolfgang Banzhaf,Lidia Yamamoto,2015-07-03 An introduction to the fundamental concepts of the emerging field of Artificial Chemistries covering both theory and practical applications The field of Artificial Life ALife is now firmly established in the scientific world but it has yet to achieve one of its original goals an understanding of the emergence of life on Earth The new field of Artificial Chemistries draws from chemistry biology computer science mathematics and other disciplines to work toward that goal For if as it has been argued life emerged from primitive prebiotic forms of self organization then studying models of chemical reaction systems could bring ALife closer to understanding the origins of life In Artificial Chemistries ACs the emphasis is on creating new interactions rather than new materials The results can be found both in the virtual world in certain multiagent systems and in the physical world in new artificial reaction systems This book offers an introduction to the fundamental concepts of ACs covering both theory and practical applications After a general overview of the field and its methodology the book reviews important aspects of biology including basic mechanisms of evolution discusses examples of ACs drawn from the literature considers fundamental questions of how order can emerge emphasizing the concept of chemical organization a closed and self maintaining set of chemicals and surveys a range of applications which include computing systems modeling in biology and synthetic life An appendix provides a Python toolkit for implementing ACs

Intelligent Systems: From Theory to Practice Vassil Sgurev, Mincho Hadjiski, 2010-08-27 In the modern science and technology there are some research directions and challenges which are at the forefront of world wide research activities because of their relevance. This relevance may be related to different aspects. First from a point of view of researchers it can be implied by just an analytic or algorithmic difficulty in the solution of problems within an area. From a broader perspective this relevance can be related to how important problems and challenges in a particular area are to society, corporate or national competitiveness etc. Needless to say that the latter more global challenges are probably more decisive a driving force for science seen from a global perspective. One of such meta challenges in the present world is that of intelligent systems. For a long time it has been obvious that the complexity of our world and the speed of changes we face in virtually all processes that have impact on our life imply a need to automate many tasks and processes that have been so far limited to human beings because they require some sort of intelligence.

Uncertainty Theory Baoding Liu, 2011-11-07 Uncertainty theory is a branch of mathematics based on normality, monotonicity, self duality, countable subadditivity and product measure axioms. Uncertainty is any concept that satisfies the axioms of uncertainty theory. Thus uncertainty is neither randomness nor fuzziness. It is also known from some surveys that a lot of phenomena do behave like uncertainty. How do we model uncertainty? How do we use uncertainty theory? In order to answer these questions this book provides a self contained comprehensive and up to date presentation of uncertainty theory including uncertain programming, uncertain risk analysis, uncertain reliability analysis, uncertain process, uncertain calculus, uncertain differential equation, uncertain logic, uncertain entailment and uncertain inference. Mathematicians, researchers, engineers, designers and students in the field of mathematics, information science, operations research, system science, industrial engineering, computer science, artificial intelligence, finance, control and management science will find this work a stimulating and useful reference.

Genome Clustering Alexander Bolshoy, Zeev Volkovich, Valery Kirzhner, Zeev Barzily, 2010-05-19 Knighting in sequence biology. Edward N Trifonov. Genome classification construction of phylogenetic trees became today a major approach in studying evolutionary relatedness of various species in their vast diversity. Although the modern genome clustering delivers the trees which are very similar to those generated by classical means and basic terminology is the same the phenotypic traits and habitats are not anymore the playground for the classification. The sequence space is the playground now. The phenotypic traits are placed by sequence characteristics words in particular. Matter of factually the phenotype and genotype merged to confusion of both classical and modern phylogeneticists. Accordingly a completely new vocabulary of stringology, information theory and applied mathematics took over. And a new brand of scientists emerged those who do know the math and simultaneously do know biology. The book is written by the authors of this new brand. There is no way to test their literacy in biology as no biologist by training would even try to enter into the elite circle of those who master their almost occult language. But the army of informaticians, formal linguists, mathematicians humbly or aggressively longing to join modern biology got an excellent
