**Barron's Profiles of American Colleges**, 2005      Higher Education Accountability Robert Kelchen, 2018-02-27

Beginning with the earliest efforts to regulate schools the author reveals the rationale behind accountability and outlines the historical development of how US federal and state policies accreditation practices private sector interests and internal requirements have become so important to institutional success and survival      *Starving the Dream* Nathan F. Alleman, Cara Cliburn Allen, Sarah Madsen, 2025-03-04 How exceptional low income students navigate and pursue opportunity in prestige oriented universities at the personal cost of hunger Beneath the veneer of prestige and promise a hidden issue pervades the campuses of America s selective universities In *Starving the Dream* Nathan F Alleman Cara Cliburn Allen and Sarah E Madsen reveal the startling contradiction between the celebrated opportunities of these prestige oriented institutions and the food insecurity that exceptional low income students must navigate within environments of plenty Through meticulous case study research the authors leverage student and administrative interviews observations and official and alternative campus tours to uncover how normatively affluent universities are rife with expectations of extensive campus involvement and material displays of wealth However visions of the ideal student experience are only attainable for low income students at the cost of either involvement or consistent food access Critiquing the social and symbolic meaning that food takes on in affluent universities where students are socialized into coveting upper middle class lifestyle markers such as gourmet coffee and branded campus clothing the book argues that administrators must better align services and support with the demands of a rigorous academic experience It also encourages universities to recognize students innovative solution making and incorporate their voices and agency in campus strategies This expansive study challenges readers to reconsider the broader impacts of higher education s structures and priorities and urges a reevaluation of what full participation should look like in these resource and opportunity rich environments *Starving the Dream* is an appeal to university leaders campus administrators and students themselves concerned with educational equity beyond mere access It provides a blueprint for meaningful change that centers the knowledge of those experiencing and administering food insecurity such that the dreams of selective university attendance need not be deferred by student hunger      **Philanthropy, Hidden Strategy, and**

The Dumbest Generation Grows Up Mark Bauerlein, 2022-02-01 From Stupefied Youth to Dangerous Adults Back in 2008 Mark Bauerlein was a voice crying in the wilderness As experts greeted the new generation of Digital Natives with extravagant hopes for their high tech future he pegged them as the Dumbest Generation Today their future doesn't look so bright and their present is pretty grim The twenty somethings who spent their childhoods staring into a screen are lonely and purposeless unfulfilled at work and at home Many of them are even suicidal The Dumbest Generation Grows Up is an urgently needed update on the Millennials explaining their not so quiet desperation and more important the threat that their ignorance poses to the rest of us Lacking skills knowledge religion and a cultural frame of reference Millennials are anxiously looking for something to fill the void Their mentors have failed them Unfortunately they have turned to politics to plug the hole in their souls Knowing nothing about history they are convinced that it is merely a catalogue of oppression inequality and hatred Why they wonder has the human race not ended all this injustice before now And from the depths of their ignorance rises the answer Because they are the first ones to care All that is needed is to tear down our inherited civilization and replace it with their utopian aspirations For a generation unacquainted with the constraints of human nature anything seems possible Having diagnosed the malady before most people realized the patient was sick Mark Bauerlein surveys the psychological and social wreckage and warns that we cannot afford to do this to another generation
