Progress in Cryptology - INDOCRYPT 2004 Anne Canteaut, Kapaleeswaran Viswanathan, 2004-12-06 The INDOCRYPT series of conferences started in 2000 INDOCRYPT 2004 was the fifth one in this series The popularity of this series is increasing every year The number of papers submitted to INDOCRYPT 2004 was 181 out of which 147 papers conformed to the specifications in the call for papers and therefore were accepted to the review process Those 147 submissions were spread over 22 countries Only 30 papers were accepted to this proceedings We should note that many of the papers that were not accepted were of good quality but only the top 30 papers were accepted Each submission received at least three independent views The selection process also included a Web based discussion phase We made efforts to compare the submissions with other ongoing conferences around the world in order to ensure detection of double submissions which were not allowed by the call for papers We wish to acknowledge the use of the Web based review software developed by Bart Preneel Wim Moreau and Joris Claessens in conducting the review process electronically The software greatly facilitated the Program Committee in completing the review process on time We would like to thank Cedric Lauradoux and the team at INRIA for their total support in configuring and managing the Web based submission and review softwares We are unable to imagine the outcome of the review process without their participation This year the invited talks were presented by Prof Colin Boyd and Prof
