Promax Manual Seismic Processing Software:

Transputer Applications and Systems '94 A. De Gloria, M. R. Jane, D. Marini, 1994 Proceedings Parallel Computing

Nafta, 1999 **Evolutionary Computation** Gai-Ge Wang, Amir H. Alavi, 2019-11-28 Computational intelligence is a general term for a class of algorithms designed by nature's wisdom and human intelligence. Computer scientists have proposed many computational intelligence algorithms with heuristic features. These algorithms either mimic the evolutionary processes of the biological world, mimic the physiological structure and bodily functions of the organism, imitate the behavior of the animal's group, mimic the characteristics of human thought, language and memory processes, or mimic the physical phenomena of nature, hoping to simulate the wisdom of nature and humanity, enabling an optimal solution to the problem and solving an acceptable solution in an acceptable time. Computational intelligent algorithms have received extensive attention at home and abroad and have become an important research direction of artificial intelligence and computer science. This book will introduce the application of intelligent optimization algorithms in detail from the aspects of computational intelligence, job shop scheduling problems, multi-objective optimization problems and machine learning. Sea Technology, 1994

Earth Science Software Directory Betty L. Gibbs, 1993-03 This is the most comprehensive listing of commercial earth science mining related software available. The format includes the name, address of the vendor, short software description, hardware requirements, price. Approximately 36 categories of software are covered related to mining, geology, geophysics, economics, hydrology, environmental, mineral processing, geographic information systems, more. The listings cover programs written for all types of computers from PCs to mainframes. The DIRECTORY is indexed by program name, by vendor, by keywords. A companion volume is titled PUBLIC DOMAIN SOFTWARE FOR EARTH SCIENTISTS which contains information primarily on public domain software, inexpensive, less than 500 commercial packages. Software information has been collected from government agencies, universities, individuals. A VARIOGRAM PRIMER is one of a series of how-to books for analyzing earth science data. Variogram calculation is the first step in a geostatistical analysis, has been applied in minerals, agriculture, forestry, hazardous waste, contamination studies, vegetation, other spatial data. The primer bridges the gap between theory and actual practice. **First Break**, 1995 News magazine of the European Association of Geoscientists Engineers EAGE

formerly European Association of Exploration Geophysicists. Covers applied geophysics, petroleum geology and reservoir engineering. **Sustainable Construction Materials and Technologies** Yoon-Moon Chun, Peter Claisse, Tarun R. Naik, Eshmaiel Ganjian, 2007-05-31 The construction materials industry is a major user of the world's resources. While enormous progress has been made towards sustainability, the scope and opportunities for improvements are significant. To further the effort for sustainable development, a conference on Sustainable Construction Materials and Technologies was held at Coventry University, Coventry, U.K. from June 11th-13th, 2007, to highlight case studies and research on new and innovative ways of achieving sustainability of construction materials and technologies. This book presents selected important

contributions made at the conference Over 190 papers from over 45 countries were accepted for presentation at the conference of which approximately 100 selected papers are published in this book The rest of the papers are published in two supplementary books Topics covered in this book include sustainable alternatives to natural sand stone and Portland cement in concrete sustainable use of recyclable resources such as fly ash ground municipal waste slag pozzolan rice husk ash silica fume gypsum plasterboard drywall and lime in construction sustainable mortar concrete bricks blocks and backfill the economics and environmental impact of sustainable materials and structures use of construction and demolition wastes and organic materials straw bale hemp etc in construction sustainable use of soil timber and wood products and related sustainable construction and rehabilitation technologies

Shallow High-resolution Reflection Seismics Jan Brouwer, Klaus Helbig, 1998 The book covers all aspects of acquisition processing and interpretation of shallow reflection seismic data for geotechnical and environmental purposes Chapter 1 provides a thorough exposition of i the mathematical foundations of digital seismics ii the physics of wave propagation in solids iii the mathematical tools for the analysis of wave fields This theoretical part is based extensively on first principles thus the book can be used as a stand alone reference to all aspects of shallow reflection seismics Chapter 2 describes the field instruments including the physical principles underlying them and their modern implementation and the acquisition techniques that allow to obtain the best data under the given technical and operational constraints Chapters 3 5 describe the processing required to maintain the resolution of seismic data without sacrificing other attributes of the data The discussion is particularly thorough in where the required techniques go beyond the standard processing steps known from exploration seismics Chapters 6 10 describe the use of portable vibrators in geotechnical surveying that was pioneered by the authors and their colleagues The first four of these chapters that describe the special techniques required and some of the opportunities offered by the use of these tools are based on experience with the portable P vibrator while chapter 10 was added after the recent introduction of the portable S vibrator to shallow surveying All five chapters are accompanied by data from actual surveys The book closes with six case histories from different settings in Western Europe based on impact sources weight drop and explosives
