Proceedings Of The 2nd International Symposium On Extenics And Innovation Methods:

Extenics and Innovation Methods Wen Cai, Chunyan Yang, Florentin Smarandache, Luigi Vladareanu, Qiaoxing Li, Guangtian Zou, Yanwei Zhao, Xingsen Li, 2013-07-15 Society forges ahead in the process of solving various contradictory problems and it is ceaselessly innovating. It is the desire of mankind to use computers and computing networks to help deal with contradictory problems and to conduct innovative activities. Using formal models to discuss object extension and the possibility of change as well as the rules and methods for innovation, Extenics is applied to solving contradictory problems and has become the basic theory, method, and instrument to achieve this goal. In the 30 years since the foundation of Extenics, researchers have built relatively complete theoretical systems, extension theory, studied formal and modeling innovation methods, extension innovation methods, and launched the applications in various fields such as information design, automation, and management, etc. Extension engineering, Extension theory, the extension innovation method, and extension engineering jointly constitute the new discipline Extenics. At the same time, the practical activities of engineering technology and management promote the integration of various innovation methods such as TRIZ and brainstorming, etc. This book collects together from scholars in various fields the research achievements in Extenics and innovation methods in order to facilitate and promote the development of Extenics and the various innovation theories and methods as well as to improve its innovative capacity in academic and business circles. *Innovative Digital Practices and Globalization in Higher Education*

Keengwe, Jared, 2023-02-17 We are moving toward a future in which digital practices are becoming more ubiquitous. Also, there is evidence to suggest that innovative digital practices are changing the face of 21st century learning environments. Critical to 21st century teaching and learning success is continued emphasis on learner preferences shaped by innovative digital technology-driven learning environments alongside teacher awareness, knowledge, and preparedness to deliver high impact instruction using active learning pedagogies. Thus, the purposeful and selective use of digital learning tools in higher education and the incorporation of appropriate active learning pedagogies are pivotal to enhancing and supporting meaningful student learning. *Innovative Digital Practices and Globalization in Higher Education* explores innovative digital practices to enhance academic performance for digital learners and prepare qualified graduates who are competent to work in an increasingly global digital workplace. Global competence has become an essential part of higher education and professional development. As such, it is the responsibility of higher education institutions to prepare students with the knowledge, skills, and competencies required to compete in the digital and global market. Covering topics such as design thinking, international students, and digital teaching innovation, this premier reference source is an essential resource for pre-service and in-service teachers, educational technologists, instructional designers, faculty, administrators, librarians, researchers, and academicians. **Proceedings of the International Petroleum and Petrochemical Technology**
