

PROGRAMMED CELL DEATH IN HIGHER PLANTS

A photograph of a pink flower with a large, dark, irregular hole in its center, set against a dark green background. The flower's petals are a vibrant pink, and the hole reveals a dark, almost black interior. The background is a solid, dark green color.

Programmed Cell Death In Higher Plants:

Programmed Cell Death in Higher Plants E. Lam, H. Fukuda, J. Greenberg, 2011-06-27 The molecular mechanisms which determine whether the cells of a multicellular organism will live or commit suicide have become a popular field of research in biology during the last decade Cell death research in the plant field has also been expanding rapidly in the past 5 years This special volume of Plant Molecular Biology seeks to bring together examples of a diverse array of experimental approaches in a single volume From the differentiation of tracheary elements in vascular plants to the more specialized cell death model of the aleurone in cereals this volume will bring the reader up to date with the characterization of different plant model systems that are currently being studied This endeavor should complement general overviews of plant cell death mechanisms that have been published elsewhere by providing more detailed information on various aspects of this field to interested graduate students and more senior biologists alike

Fertilization in Higher Plants Mauro Cresti, Giampiero Cai, Alessandra Moscatelli, 2012-12-06 Biotechnological methods are opening new ways in plant breeding They allow novel strategies for improving crop productivity and quality especially in the agrofood sector The molecular mechanisms underlying these biotechnological approaches are presented here Topics included are pollen development pollen tube growth macrosporogenesis and fertilization and the effects of pesticides on sexual plant reproduction Fertilization in higher plants is a complex process consisting of two events the fusion of the egg with one sperm cell resulting in the diploid zygote and the fusion of embryo sac nuclei with another sperm cell leading to a triploid endosperm This double fertilization is preceded by the pollination process and a long lasting interaction between the diploid pistil and the haploid pollen tube progamic phase Fertilization of flowering plants results in the formation of seeds and fruits our basic food supply

Programmed Cell Death in Protozoa Jose Perez-Martin, 2008-12-10 Under the name of programmed cell death PCD are included diverse molecular mechanisms of cell suicide which play an essential role in the development of multicellular organisms The best known PCD mechanism in multicellular organisms is called apoptosis However recent studies indicate that PCD is also present in protozoa and unicellular eukaryotes The eleven chapters of this book give the reader a comprehensive update of the progress in the understanding of the mechanisms of PCD in protozoa The chapters have been written by experts in this field of research and are arranged following an evolutionary point of view

Plant Programmed Cell Death Arunika N. Gunawardena, Paul F. McCabe, 2015-10-08 Programmed cell death PCD is a genetically encoded active process which results in the death of individual cells tissues or whole organs PCD plays an essential role in plant development and defense and occurs throughout a plant's lifecycle from the death of the embryonic suspensor to leaf and floral organ senescence In plant biology PCD is a relatively new research area however as its fundamental importance is further recognized publications in the area are beginning to increase significantly The field currently has few foundational reference books and there is a critical need for books that summarize recent findings in this important area This book contains chapters written by several

of the world's leading researchers in PCD This book will be invaluable for PhD or graduate students or for scientists and researchers entering the field Established researchers will also find this timely work useful as an up to date overview of this fascinating research area *Reactive Oxygen, Nitrogen and Sulfur Species in Plants* Mirza Hasanuzzaman, Vasileios Fotopoulos, Kamrun Nahar, Masayuki Fujita, 2019-07-02 Presents a multidisciplinary analysis of the integration among reactive oxygen species ROS reactive nitrogen species RNS and reactive sulfur species RSS Since plants are the main source of our food the improvement of their productivity is the most important task for plant biologists In this book leading experts accumulate the recent development in the research on oxidative stress and approaches to enhance antioxidant defense system in crop plants They discuss both the plant responses to oxidative stress and mechanisms of abiotic stress tolerance and cover all of the recent approaches towards understanding oxidative stress in plants providing comprehensive information about the topics It also discusses how reactive nitrogen species and reactive sulfur species regulate plant physiology and plant tolerance to environmental stresses *Reactive Oxygen Nitrogen and Sulfur Species in Plants Production Metabolism Signaling and Defense Mechanisms* covers everything readers need to know in four comprehensive sections It starts by looking at reactive oxygen species metabolism and antioxidant defense Next it covers reactive nitrogen species metabolism and signaling before going on to reactive sulfur species metabolism and signaling The book finishes with a section that looks at crosstalk among reactive oxygen nitrogen and sulfur species based on current research done by experts Presents the newest method for understanding oxidative stress in plants Covers both the plant responses to oxidative stress and mechanisms of abiotic stress tolerance Details the integration among reactive oxygen species ROS reactive nitrogen species RNS and reactive sulfur species RSS Written by 140 experts in the field of plant stress physiology crop improvement and genetic engineering Providing a comprehensive collection of up to date knowledge spanning from biosynthesis and metabolism to signaling pathways implicated in the involvement of ROS to plant defense mechanisms *Reactive Oxygen Nitrogen and Sulfur Species in Plants Production Metabolism Signaling and Defense Mechanisms* is an excellent book for plant breeders molecular biologists and plant physiologists as well as a guide for students in the field of Plant Science

Multigenic and Induced Systemic Resistance in Plants Tuzun Sadik, Bent Elizabeth, 2006-10-26 Plants have developed very sophisticated mechanisms to combat pathogens and pests using the least amount of reserved or generated energy possible They do this by activating major defense mechanisms after recognition of the organisms that are considered to be detrimental to their survival therefore they have been able to exist on Earth longer than any other higher organisms It has been known for the past century that plants carry genetic information for inherited resistance against many pathogenic organisms including fungi bacteria and viruses and that the relationship between pathogenic organisms and hosts plants are rather complex and in some cases time dependent This genetic information has been the basis for breeding for resistance that has been employed by plant breeders to develop better

yielding disease resistant varieties some of which are still being cultivated Single gene resistance is one type of resistance which has been extensively studied by many research groups all around the world using biotechnological methodologies that have been the subject of many books and journal articles therefore it is beyond the scope of this book This type of resistance is very effective although it can be overcome by the pressure of pathogenic organisms since it depends on interaction of a single elicitor molecule from the pathogen with a single receptor site in the host

Regulation and Dysfunction of Apoptosis Yusuf Tutar, 2022-04-06 The book provides a comprehensive review of apoptotic cell death It discusses the mechanism of apoptosis and emerging principles of drug resistance in cancer The development of novel drug targets and drug delivery systems for inhibiting or inducing apoptosis are the ultimate goal Further upregulation of anti apoptotic proteins and loss of pro apoptotic proteins strongly favors apoptosis evasion The ability of cancer cells to evade apoptosis is critical for the progression and clonal expansion of malignantly transformed cells Defective apoptosis imparts proliferative advantage to cancer cells or cells with the potential to become cancerous The mechanisms employed by cancer cells to evade apoptosis can be used in the strategic design of therapeutic regimens aimed at exploiting apoptotic signaling networks to ensure tumor specific cell death This book presents knowledge of the molecular mechanisms of defective apoptosis that could be translated into the development of novel therapeutic agents and therapeutic modalities for cancer treatment

Plant Cell Death Processes Larry D. Nooden, 2003-12-09 Programmed cell death is a common pattern of growth and development in both animals and plants However programmed cell death and related processes are not as generally recognized as central to plant growth This is changing fast and is becoming more of a focus of intensive research This edited work will bring under one cover recent reviews of programmed cell death apoptosis and senescence Summaries of the myriad aspects of cell death in plants Discussion of the broadest implications of these disparate results A unification of fields where there has been no cross talk Enables easy entry into diverse but related lines of research

Essentials of Apoptosis Xiao-Ming Yin, Zheng Dong, 2003-02-27 Basic and clinical investigators systematically compile a comprehensive but concise summary of essential up to date information about apoptosis The authors present the concepts the molecular architecture the biochemical pathways and the pathophysiological significance of apoptosis In addition standard biochemical and cell biologic approaches to apoptosis research are described as a guideline for bench work with clinical applications detailed for immune disorders cancer ischemia reperfusion injury and neuronal degeneration

Reactive Oxygen Species and Antioxidants in Higher Plants S. Dutta Gupta, 2010-09-15 Providing basic information on reactive oxygen species ROS this volume describes new developments in the action of ROS the role of antioxidants and the mechanisms developed to scavenge free radical associated cellular damage It illustrates the chemistry of ROS ROS signaling antioxidative defense systems transgene approaches in scavenging R
