Selected Works Of Terry Speed Selected Works In Probability And Statistics:

Selected Works of Terry Speed Sandrine Dudoit, 2012-04-11 The purpose of this volume is to provide an overview of Terry Speed's contributions to statistics and beyond. Each of the fifteen chapters concerns a particular area of research and consists of a commentary by a subject matter expert and selection of representative papers. The chapters organized more or less chronologically in terms of Terry's career encompass a wide variety of mathematical and statistical domains along with their application to biology and medicine. Accordingly, earlier chapters tend to be more theoretical covering some algebra and probability theory while later chapters concern more recent work in genetics and genomics. The chapters also span continents and generations as they present research done over four decades while crisscrossing the globe. The commentaries provide insight into Terry's contributions to a particular area of research by summarizing his work and describing its historical and scientific context, motivation and impact. In addition to shedding light on Terry's scientific achievements, the commentaries reveal endearing aspects of his personality such as his intellectual curiosity, energy, humor, and generosity.

Selected Works of Terry Speed T. P. Speed, 2012-04-11 This selection of work by the prolific statistician which covers 15 research areas provides an overview of the breadth of his contribution to the subject as well as a complete bibliography of his works and commentary by respected contemporary statisticians.

Selected Works of E. L. Lehmann Javier Rojo, 2012-01-16 These volumes present a selection of Erich L. Lehmann's monumental contributions to Statistics. These works are multifaceted. His early work included fundamental contributions to hypothesis testing, theory of point estimation, and more generally to decision theory. His work in Nonparametric Statistics was groundbreaking. His fundamental contributions in this area include results that came to assuage the anxiety of statisticians that were skeptical of nonparametric methodologies and his work on concepts of dependence has created a large literature. The two volumes are divided into chapters of related works. Invited contributors have critiqued the papers in each chapter and the reprinted group of papers follows each.

commentary A complete bibliography that contains links to recorded talks by Erich Lehmann and which are freely accessible to the public and a list of Ph D students are also included These volumes belong in every statistician s personal collection and are a required holding for any institutional library *Selected Works of Debabrata Basu* Anirban DasGupta,2011-02-04 This book contains a little more than 20 of Debabrata Basu s most significant articles and writings Debabrata Basu is internationally known for his highly influential and fundamental contributions to the foundations of statistics survey sampling sufficiency and invariance The major theorem bearing his name has had numerous applications to statistics and probability The articles in this volume are reprints of the original articles in a chronological order The book also contains eleven commentaries written by some of the most distinguished scholars in the area of foundations and statistical inference These commentaries are by George Casella and V Gopal Phil Dawid Tom DiCiccio and Alastair Young Malay Ghosh Jay kadane Glen Meeden Robert Serfling Jayaram Sethuraman Terry Speed and Alan Welsh **Selected Works of David Brillinger** Peter Guttorp,David Brillinger,2013-04-10 This volume contains 30 of David Brillinger s most influential papers He is an eminent statistical scientist having published broadly in time series and point process analysis seismology neurophysiology and population biology Each of these areas are well represented in the book The volume has been divided into four parts each with comments by one of Dr Brillinger s former PhD students His more theoretical papers have comments by Victor Panaretos from Switzerland The area of time series has commentary by Pedro Morettin from Brazil The biologically oriented papers are commented by Tore Schweder from Norway and Haiganoush Preisler from USA while the point process papers have comments by Peter Guttorp from USA In addition the volume contains a Statistical Science interview with Dr Brillinger and his bibliography *Statistical Modeling and Machine Learning for Molecular Biology* Alan Moses,2017-01-06 Molecular biologists are performing increasingly large and complicated experiments but often have little background in data analysis The book is devoted to teaching the statistical and computational techniques molecular biologists need to analyze their data It explains the big picture concepts in data analysis using a wide variety of real world molecular biological examples such as eQTLs ortholog identification motif finding inference of population structure protein fold prediction and many more The book takes a pragmatic approach focusing on techniques that are based on elegant mathematics yet are the simplest to explain to scientists with little background in computers and statistics **Lecture Notes in Computational Intelligence and Decision Making** Sergii Babichev,Volodymyr Lytvynenko,Waldemar Wójcik,Svetlana Vyshemyrskaya,2020-07-25 This book includes 46 scientific papers presented at the conference and reflecting the latest research in the fields of data mining machine learning and decision making The international scientific conference Intellectual Systems of Decision Making and Problems of Computational Intelligence was held in the Kherson region Ukraine from May 25 to 29 2020 The papers are divided into three sections Analysis and Modeling of Complex Systems and Processes Theoretical and Applied Aspects of Decision Making Systems and Computational Intelligence and Inductive Modeling The book will be of interest to scientists

and developers specialized in the fields of data mining machine learning and decision making systems **Teaching Statistics** Andrew Gelman, Deborah Nolan, 2002-08-08 Students in the sciences economics psychology social sciences and medicine take introductory statistics Statistics is increasingly offered at the high school level as well However statistics can be notoriously difficult to teach as it is seen by many students as difficult and boring if not irrelevant to their subject of choice To help dispel these misconceptions Gelman and Nolan have put together this fascinating and thought provoking book Based on years of teaching experience the book provides a wealth of demonstrations examples and projects that involve active student participation Part I of the book presents a large selection of activities for introductory statistics courses and combines chapters such as First week of class with exercises to break the ice and get students talking then Descriptive statistics collecting and displaying data then follows the traditional topics linear regression data collection probability and inference Part II gives tips on what does and what doesn't work in class how to set up effective demonstrations and examples how to encourage students to participate in class and work effectively in group projects A sample course plan is provided Part III presents material for more advanced courses on topics such as decision theory Bayesian statistics and sampling

The Art of Statistical Science Kanti V. Mardia, 1992-02-18 Contains a series of articles dedicated to Geof Watson who has made wide ranging contributions to statistics mostly stimulated by scientific problems His contributions to directional data analysis statistical biology time series etc are well established This volume reflects the scope of Dr Watson's interests in many different subject areas and the overviews presented are about contributions that statistics are making or might make to these areas
