You are working in the after hours clinic during a typical January evening. In the four hours you have been there you have seen 10 patients and you are about to go home for your night shift. You find that a 10-year-old boy is one of your partner's patients who has been lost to follow-up. Your partner has sent a certified letter to the last known address letting you know they have moved their last year's health supervision visits and that they want to know about the child's status. You find the child's mother immediately. You tell her that if they did not call to see her soon, she was going to report the author and start pursuing the situation as a neglect case. The nurse informs you that the mother received the certified letter today and immediately made an appointment because she was furious she had received a letter and wanted to let someone know about it. You talk in the room, you note that the patient is a 10-year-old male named Samuel. As you enter the room, you find Samuel is sitting alone while the nurse tells you that the mother was not available. You tell the mother that you are here and that you will be with her. As you calm the mother down you obtain a detailed medical history.
