Staff, 1999-02-01 **Product Costing and Investments in Shared Technology** Stephen Gregory Lynn, 2008 We analytically model a setting in which two product centers share a manufacturing process the issue being to assign the shared costs in a way that induces rational product center managers to truthfully report private information needed for an ex ante best investment decision The shared service in our model is characterized by stochastic demand and processing times investment in it is a function of the level of statistical process control achieved and our product center managers are primarily concerned with getting the best trade off between economies of scope and reduced manufacturing lead times lower delay costs We are particularly interested in the situation when a product center's report on its delay cost parameter is based on private information that is poor or non-existent It is found that in this case a product center in our model would always prefer to invest at a weakly higher level than its cost information justifies This could provide one formal explanation of observations Lee 1996 Foster and Horngren 1988 that investments in advanced manufacturing technology specifically flexible manufacturing often require non-accounting justification i.e. are higher than the accounting numbers alone would warrant *Manufacturing Costs and Accounts* Alexander Hamilton Church, 1917 The Cost of Production Burt Clifford Bean, 2025-05-22 The Cost of Production by Burt Clifford Bean delves into the science of costs and its practical application across diverse manufacturing sectors First published in 1905 this foundational work explores the principles underlying cost determination offering insights into how businesses can accurately assess and manage their production expenses Featuring illustrative examples from cost experts the book elucidates various costing methodologies relevant to different lines of manufacturing It is an invaluable resource for those seeking a comprehensive understanding of cost accounting and its impact on industrial management This historical work remains relevant for students and professionals interested in the evolution of cost accounting practices and the fundamental concepts that continue to shape modern business strategies This work has been selected by scholars as being culturally important and is part of the knowledge base of civilization as we know it This work was reproduced from the original artifact and remains as true to the original work as possible Therefore you will see the original copyright references library stamps as most of these works have been housed in our most important libraries around the world and other notations in the work This work is in the public domain in the United States of America and possibly other nations Within the United
