A Project-Based Guide to Undergraduate Research in Mathematics Pamela E. Harris,Erik Insko,Aaron Wootton,2020-04-17 This volume provides accessible and self contained research problems designed for undergraduate student projects and simultaneously promotes the development of sustainable undergraduate research programs The chapters in this work span a variety of topical areas of pure and applied mathematics and mathematics education Each chapter gives a self contained introduction on a research topic with an emphasis on the specific tools and knowledge needed to create and maintain fruitful research programs for undergraduates Some of the topics discussed include Disease modeling Tropical curves and surfaces Numerical semigroups Mathematics Education This volume will primarily appeal to undergraduate students interested in pursuing research projects and faculty members seeking to mentor them It may also aid students and faculty participating in independent studies and capstone projects **Proceedings of the HCT International General Education Conference (HCTIGEC 2024)** Natalie-Jane Howard,Angela Martin,Agariadne Dwinggo Samala,2025-02-24 This book is an open access The Higher Colleges of Technology s HCT General Education Division GED and the HCT Dubai Women s campus are pleased to host the second HCT International General Education Conference on March 15 2024 The theme of this year s conference is The Future of Work Equipping Students with Applied Learning Skills for Success This theme highlights the critical need to prepare students for the evolving landscape of the labor market and employability The conference explores the intersection of applied learning and the future of work recognizing that theoretical knowledge alone is no longer sufficient and that students need to apply their learning in real world contexts By engaging in applied learning opportunities students can develop the skills mindset and adaptability required to navigate the challenges and opportunities of the future workplace The conference seeks to address various aspects related to preparing students for success in the future of work including skills development for the digital era cultivating an entrepreneurial mindset bridging the gap between education and industry demands problem solving and critical thinking and the development of soft skills such as emotional intelligence and interpersonal competence Overall the conference aims to bring together educators professionals and researchers to share best practices innovative approaches and strategies for equipping students with applied learning skills that will enable their success in the dynamic and ever changing future of work *Conference proceedings. ICT for language learning. 10th Edition* Pixel,2017-10-23 **Student Solutions Manual for Trigonometry** Michael Sullivan,Kevin Bodden,Randy Gallaher,2007-07-17 Fully worked solutions to odd numbered exercises **ENC Focus** ,2001 Trigonometry Michael Sullivan,1999 For undergraduate courses in College Algebra Algebra and Trigonometry Trigonometry and Precalculus A proven motivator for students of diverse mathematical backgrounds this text explores mathematics within the context of real life using understandable realistic applications consistent with the abilities of any student Graphing techniques are emphasized including a thorough discussion of polynomial rational exponential and

logarithmic functions and conics The use of a graphing calculator is optional *Make: Trigonometry* Joan Horvath, Rich Cameron, 2023-08-21 Trigonometry has 2000 year old roots in everyday useful endeavors like finding the size of an object too big or far away to measure directly or navigating from Point A to Point B However it is often taught very theoretically with an emphasis on abstractions *Make Trigonometry* uses 3D printable models and readily available physical objects like wire and cardboard tubes to develop intuition about concepts in trigonometry and basic analytic geometry Readers will imagine the thought process of the people who invented these mathematical concepts and can try out math experiments to see for themselves how ingenious ancient navigators and surveyors really were The analytic geometry part of the book links equations to many of these intuitive concepts which we explore through in depth explanations of manipulative models of conic sections This book is aimed at high school students who might be in Algebra II or Pre Calculus It shows the geometrical and practical sides of these topics that otherwise can drown in their own algebra *Make Trigonometry* builds on the basics of the authors earlier book *Make Geometry* and is intended as a bridge from that book to their *Make Calculus* book The user can read this book and understand the concepts from the photographs of 3D printable models alone However since many models are puzzle like we encourage the reader to print the models on any consumer grade filament based 3D printer The models are available for download in a freely available open source repository They were created in the free program OpenSCAD and can be 3D printed or modified by the student in OpenSCAD to learn a little coding along the way
