Groups and Symmetry: A Guide to Discovering Mathematics David W. Farmer, 1996 Mathematics is discovered by looking at examples noticing patterns making conjectures and testing those conjectures Once discovered the final results get organized and put in textbooks The details and the excitement of the discovery are lost This book introduces the reader to the excitement of the original discovery By means of a wide variety of tasks readers are led to find interesting examples notice patterns devise rules to explain the patterns and discover mathematics for themselves The subject studied here is the mathematics behind the idea of symmetry but the methods and ideas apply to all of mathematics The only prerequisites are enthusiasm and a knowledge of basic high school math The book is only a guide It will start you off in the right direction and bring you back if you stray too far The excitement and the discovery are left to you **A Practical Arithmetic** Charles

Scott Venable, 1874 **New Mathematical Cuneiform Texts** Jöran Friberg, Farouk N.H. Al-Rawi, 2017-02-13 This monograph presents in great detail a large number of both unpublished and previously published Babylonian mathematical texts in the cuneiform script It is a continuation of the work A Remarkable Collection of Babylonian Mathematical Texts Springer 2007 written by J ran Friberg the leading expert on Babylonian mathematics Focussing on the big picture Friberg explores in this book several Late Babylonian arithmetical and metro mathematical table texts from the sites of Babylon Uruk

and Sippar collections of mathematical exercises from four Old Babylonian sites as well as a new text from Early Dynastic Early Sargonic Umma which is the oldest known collection of mathematical exercises A table of reciprocals from the end of the third millennium BC differing radically from well documented but younger tables of reciprocals from the Neo Sumerian and Old Babylonian periods as well as a fragment of a Neo Sumerian clay tablet showing a new type of a labyrinth are also discussed The material is presented in the form of photos hand copies transliterations and translations accompanied by exhaustive explanations The previously unpublished mathematical cuneiform texts presented in this book were discovered by Farouk Al Rawi who also made numerous beautiful hand copies of most of the clay tablets Historians of mathematics and the Mesopotamian civilization linguists and those interested in ancient labyrinths will find New Mathematical Cuneiform Texts particularly valuable The book contains many texts of previously unknown types and material that is not available elsewhere
