

FOUNDATION OF MEDICAL WORDS

A. Structure

Most medical words are composed of two or more terms. To define a medical word:

- divide the word into its terms
- analyze the terms
- define the word

Examples:

Pericarditis

peri = around; **card** = heart; **itis** = inflammation
Inflammation around the heart

Oncology

onc = tumor, mass; **logy** = study of
Study of tumors

B. Terms

Term = Term (____ + ____) = medical word

There are five categories of terms:

1. Prefix - beginning of a word

(ex., **pre** ____; **post** ____)

Designated by a "____" after the term.

2. Suffix - ending of a word

(ex., ____ **ology**; ____ **itis**)

Designated by a "____" before the term.

3. Root - foundation/base of a word (ex., **hepat**; **gastr**)

4. Combining vowel - vowel (usually "o") added to a root (ex., **gastro**).

Use a combining vowel when joining:

- Root to another root (ex., **gastrohepatitis**)
- Root to a suffix beginning with a consonant (ex., **cardiomegaly**)
- Combining form - root + vowel (ex., **hepat/o**; **gastro/o**)

Designated by a "/" between the root and the vowel

Examples:

Hyperleukocytosis

hyper (prefix) = excessive
leuko (combining form) = white
cyt (root) = cell
osis (suffix) = condition of

Definition: condition of excessive white blood cells (leukocytes)

Hematoxic

hemato (combining form) = blood
tox (root) = poison

ic (suffix) = pertaining to

Definition: pertaining to blood poisoning

TIPS:

- Some terms have more than one definition. To determine the correct definition in a particular medical word, analyze the other terms in the word.

Example:

Polysarthritis

polio = gray (matter)
myel = spinal cord, bone marrow
itis = inflammation

Definition: Inflammation of the gray matter of the spinal cord. The bone marrow does not have gray matter.

- Some terms may function as a root/combining form in one word and a suffix in another word. Classification depends upon the specific medical word.

Examples:

Cytology
cyte (combining form) = cell

logy (suffix) = study of

Definition: Study of cells

Erythrocyte

erythro (combining form) = red

cyte (suffix) = cell

Definition: Red blood cell
