

Performance Task #1: Solving Quadratic Equations

Instructions: Choose one quadratic equation from the list below and solve it using the three methods: factoring, completing the square, and using the quadratic formula. Present your solutions in a neat and organized manner on a poster or in a digital document (long coupon).

Quadratic Equations to Choose From:

1. $x^2 - 4x - 5 = 0$

2. $x^2 + 6x + 8 = 0$

3. $2x^2 - 3x - 2 = 0$

Quadratic Performance Task:

Clarity for Learning John Almarode, Kara Vandas, 2018-10-24 An essential resource for student and teacher clarity With the ever changing landscape of education teachers and leaders often find themselves searching for clarity in a sea of standards curriculum resources and competing priorities Clarity for Learning offers a simple and doable approach to developing clarity and sharing it with students through five essential components crafting learning intentions and success criteria co constructing learning intentions and success criteria with learners creating opportunities for students to respond effective feedback on and for learning students and teachers sharing learning and progress The book is full of examples from teachers and leaders who have shared their journey struggles and successes for readers to use to propel their own work forward NASA Technical Paper, 1984 *Advanced Process Engineering Control* Paul Serban Agachi, Mircea Vasile Cristea, Alexandra Ana Csavdari, Botond Szilagyi, 2023-11-20 As a mature topic in chemical engineering the book provides methods problems and tools used in process control engineering It discusses process knowledge sensor system technology actuators communication technology and logistics design and construction of control systems and their operation The knowledge goes beyond the traditional process engineering field by applying the same principles to biomedical processes energy production and management of environmental issues The book explains all the determinations in the chemical systems or process systems starting from the beginning of the processes going through the intricate interdependency of the process stages analyzing the hardware components of a control system and ending with the design of an appropriate control system for a process parameter or a whole process The book is first addressed to the students and graduates of the departments of Chemical or Process Engineering Second to the chemical or process engineers in all industries or research and development centers because they will notice the resemblance in approach from the system and control point of view between different fields which might seem far from each other but share the same control philosophy *Parallel Curriculum Units for Mathematics, Grades 6–12* Jann H. Leppien, Jeanne H. Purcell, 2011-04-07 Maximize your mathematics curriculum with this powerful guidebook that shows how to create a high quality curriculum and differentiate lessons to benefit all students **Software for Computer Control 1982** G. Ferrate, E. A. Puente, 2014-05-16 Software for Computer Control 1982 covers the proceedings of the Third IFAC IFIP Symposium The book discusses the state of software development for digital computer applications for science and control With a total of 73 papers the book covers topics such as real time language and operating systems man machine communication software software for robots software for distributed control systems C A D of digital computer controls systems algorithms for digital computer control control software engineering and management and industrial applications Computer scientists engineers and I T professionals will find this book interesting since it provides discussions on the various applications of computer programs **Introduction to Process Control** Jose A. Romagnoli, Ahmet Palazoglu, 2020-07-14 Introduction to Process Control Third Edition continues to provide a bridge between

traditional and modern views of process control by blending conventional topics with a broader perspective of integrated process operation control and information systems Updated and expanded throughout this third edition addresses issues highly relevant to today's teaching of process control Discusses smart manufacturing new data preprocessing techniques and machine learning and artificial intelligence concepts that are part of current smart manufacturing decisions Includes extensive references to guide the reader to the resources needed to solve modeling classification and monitoring problems Introduces the link between process optimization and process control optimizing control including the effect of disturbances on the optimal plant operation the concepts of steady state and dynamic back off as ways to quantify the economic benefits of control and how to determine an optimal transition policy during a planned production change Incorporates an introduction to the modern architectures of industrial computer control systems with real case studies and applications to pilot scale operations Analyzes the expanded role of process control in modern manufacturing including model centric technologies and integrated control systems Integrates data processing reconciliation and intelligent monitoring in the overall control system architecture Drawing on the authors combined 60 years of teaching experiences this classroom tested text is designed for chemical engineering students but is also suitable for industrial practitioners who need to understand key concepts of process control and how to implement them The text offers a comprehensive pedagogical approach to reinforce learning and presents a concept first followed by an example allowing students to grasp theoretical concepts in a practical manner and uses the same problem in each chapter culminating in a complete control design strategy A vast number of exercises throughout ensure readers are supported in their learning and comprehension Downloadable MATLAB toolboxes for process control education as well as the main simulation examples from the book offer a user friendly software environment for interactively studying the examples in the text These can be downloaded from the publisher's website Solutions manual is available for qualifying professors from the publisher

Digital Signal Processing and Applications with the OMAP - L138 eXperimenter Donald S. Reay, 2012-03-20 Teaches digital signal processing concepts via hands on examples The OMAP L138 eXperimenter is the latest inexpensive DSP development system to be adopted by the Texas Instruments University Program The OMAP L138 processor contains both ARM and DSP cores and is aimed at portable and mobile multimedia applications This book concentrates on the demonstration of real time DSP algorithms implemented on its C6748 DSP core Digital Signal Processing and Applications with the OMAP L138 eXperimenter provides an extensive and comprehensive set of program examples to aid instructors in teaching DSP in a laboratory using audio frequency signals making it an ideal text for DSP courses at senior undergraduate and postgraduate levels Subjects covered include polling based interrupt based and DMA based I/O methods and how real time programs may be run using the board support library BSL the DSP BIOS real time operating system or the DSP BIOS Platform Support Package Chapters include Analog input and output with the OMAP L138 eXperimenter Finite impulse response filters Infinite impulse response filters Fast Fourier transform Adaptive filters DSP

BIOS and platform support package Each chapter begins with a review of background theory and then presents a number of real time program examples to reinforce understanding of that theory and to demonstrate the use of the OMAP L138 eXperimenter and Texas Instruments Code Composer Studio integrated development environment **Digital Signal Processing Using the ARM Cortex M4** Donald S. Reay, 2015-09-21 Features inexpensive ARM Cortex M4 microcontroller development systems available from Texas Instruments and STMicroelectronics This book presents a hands on approach to teaching Digital Signal Processing DSP with real time examples using the ARM Cortex M4 32 bit microprocessor Real time examples using analog input and output signals are provided giving visible using an oscilloscope and audible using a speaker or headphones results Signal generators and or audio sources e g iPods can be used to provide experimental input signals The text also covers the fundamental concepts of digital signal processing such as analog to digital and digital to analog conversion FIR and IIR filtering Fourier transforms and adaptive filtering Digital Signal Processing Using the ARM Cortex M4 Uses a large number of simple example programs illustrating DSP concepts in real time in an electrical engineering laboratory setting Includes examples for both STM32F407 Discovery and the TM4C123 Launchpad using Keil MDK ARM on a companion website Example programs for the TM4C123 Launchpad using Code Composer Studio version 6 available on companion website Digital Signal Processing Using the ARM Cortex M4 serves as a teaching aid for university professors wishing to teach DSP using laboratory experiments and for students or engineers wishing to study DSP using the inexpensive ARM Cortex M4 **Wind and Seismic Effects** United States-Japan Cooperative Program in Natural Resources.
