Neuropsychological Management Of Mild Traumatic Brain Injury:

Neuropsychological Management of Mild Traumatic Brain Injury Sarah A. Raskin, Catherine A. Mateer, 1999-11-11 Despite the importance of the problem strikingly little has been written about effective approaches to the treatment of individuals with mild to moderate brain injury This book is designed for neuropsychologists counseling and rehabilitation psychologists and other rehabilitation professionals who work with individuals who have sustained brain injuries of mild to moderate severity It provides a context for understanding and evaluating the common consequences of such injuries and offers both theoretical perspectives and practical suggestions for helping individuals to adjust to and compensate for residual difficulties Early chapters focus on different domains of cognitive functioning while later chapters describe clinical approaches to helping clients manage common emotional reactions such as depression irritability and anxiety While the book acknowledges and discusses the controversy about the origins of persistent symptoms following mild brain injuries it does not focus on the controversy Rather it adopts a what works approach to dealing with individuals who have persistent symptoms and perceptions that contribute to disability and to emotional distress Many of these individuals benefit significantly from neuropsychological intervention Case examples throughout the book illustrate the adaptation of cognitive cognitive behavioral and traditional psychotherapeutic approaches to individuals with mild to moderate brain injury Self regulation and self management of both cognitive failures and emotional responses are described as appropriate and effective in this population

Handbook on the Neuropsychology of Traumatic Brain Injury Mark Sherer, Angelle M. Sander, 2014-05-17

This book collects and synthesizes the latest thinking on the condition in its variety of cognitive and behavioral presentations matched by a variety of clinical responses. Acknowledging the continuum of injury and the multi stage nature of recovery, expert contributors review salient research data and offer clinical guidelines for the neuropsychologist working with TBI patients, detailing key areas of impairment, brief and comprehensive assessment methods and proven rehabilitation strategies. Taken together, these chapters provide a framework for best serving a wide range of TBI patients including children, elders and patients in multidisciplinary settings and model treatment that is evidence based and relevant. A sample of the topics featured in the Handbook: Bedside evaluations in TBI, Outcome assessment in TBI, Collaborating with family caregivers in the rehabilitation of persons with TBI, Behavioral assessment of acute neurobehavioral syndromes to inform treatment, Pediatric TBI assessment outcomes, intervention, Special issues with mild TBI in veterans and active duty service members. Expanding professional knowledge on a topic that continues to grow in importance, the *Handbook on the Neuropsychology of Traumatic Brain Injury* is a premier resource not only for neuropsychologists but also for other professionals in cognitive care and trainees entering the field.

Traumatic Brain Injury in Sports Mark Lovell, Jeffrey Barth, Michael Collins, Ruben Echemendia, 2020-07-09

Traumatic brain injury (TBI) in sports has become an important international public health issue over the past two decades. However, until recently, return to play decisions following a sports related traumatic brain injury have been based on anecdotal evidence and have not been based on scientifically validated clinical protocols. Over the past decade, the field of Neuropsychology has become an increasingly important component of the return to play decision making process following TBI. Neuropsychological assessment instruments are increasingly being adapted for use with athletes throughout the world and the field of sports neuropsychology appears to be a rapidly evolving subspecialty. This book provides a comprehensive overview of the application of neuropsychological assessment instruments in sports and it is structured to present a global perspective on contemporary research. In addition to a review of current research, *Traumatic Brain Injury in Sports: An International Neuropsychological Perspective* presents a thorough review of current clinical models that are being implemented internationally within American and Australian rules football, soccer, boxing, ice hockey, rugby and equestrian sports.
