The Art of Authorial Presence Gary Richard Thompson, 1993 The critical literary world has spent a wealth of thought and words on the question of Hawthorne himself Where does he stand in his works In history In literary tradition

In this major new study G R Thompson recasts the Hawthorne question to show how authorial presence in the writer's works is as much a matter of art as the writing itself. The Hawthorne who emerges from this masterful analysis is not as has been supposed identical to the provincial narrator of his early tales; instead he is revealed to be the skillful manipulator of that narrative voice, an author at an ironic distance from the tales he tells. By focusing on the provincial tales as they were originally conceived as a narrative cycle, Thompson is able to recover intertextual references that reveal Hawthorne's preoccupation with framing strategies and variations on authorial presence. The author shows how Hawthorne deliberately constructs sentimental narratives only to deconstruct them. Thompson's analysis provides a new aesthetic context for understanding the whole shape of Hawthorne's career as well as the narrative, ethical, and historical issues within individual works. Revisionary in its view of one of America's greatest authors, *The Art of Authorial Presence* also offers invaluable insight into the problems of narratology and historiography, ethics and psychology, romanticism and idealism, and the cultural myths of America.

The World of Antebellum America Alexandra Kindell, 2018-09-20 This set provides insight into the lives of ordinary Americans, free and enslaved, in farms and cities in the North and the South who lived during the years of 1815 to 1860. Throughout the Antebellum Era resonated the theme of change: migration, urban growth, the economy, and the growing divide between North and South all led to great changes to which Americans had to respond. By gathering the important aspects of antebellum Americans' lives into an encyclopedia, *The World of Antebellum America* provides readers with the opportunity to understand how people across America lived and worked, what politics meant to them, and how they shaped or were shaped by economics. Entries on simple topics such as bread and biscuits explore workers' need for calories, the role of agriculture, and gendered divisions of labor, while entries on more complex topics such as aging and death disclose Americans' feelings about life itself. Collectively, the entries pull the reader into the lives of ordinary Americans, while section introductions tie together the entries and provide an overarching narrative that primes readers to understand key concepts about antebellum America before delving into Americans' lives in detail.

New Essays on The Country of the Pointed Firs June Howard, 1994-05-27 This is a collection of new essays on one of the most important works of New England local colour fiction, *The Country of the Pointed Firs* by Sarah Orne Jewett. It builds on feminist literary scholarship that affirms the importance and value of Jewett's work but goes beyond previously published studies by offering an analysis of how race, nationalism, and the literary marketplace shape her narrative. The volume constitutes a major rethinking of Jewett's contribution to American literature and will be of broad interest to the fields of American literary studies, feminist cultural criticism, and American studies.

Fictions of America Judie Newman, 2007-12-04 The Internet has had a huge impact on channels of communication and information, reaching across time and space to connect the world through globalisation. In this Internet-led world, story links to story, windows open on new stories, and no overall authority establishes priority. This sense of globalisation has raised many questions for contemporary American novelists, primarily the usefulness or

redundancy of narrative and its potentially adaptive function What are the right stories for such a broadband world How do contemporary American novelists respond to issues such as the influence of the multinational corporation and its predecessors human rights Imperialism the literary work as a marketable commodity translation as betrayal data overload and the implosion of the virtual into the biosphere Is globalisation inevitable or is it a fiction which fiction turns into reality Fictions of America explores these questions and looks at the ways in which India China and Africa can be said to have underwritten American culture how literature has been marketed globally and how novelists have answered back to power with resistant fictions Judie Newman examines a wide range of fiction from the mid nineteenth to the twenty first century including the transnational adoption narrative short story historical novel slave narrative international bestseller and Western to illustrate her argument Looking closely at authors such as Bharati Mukherjee John Updike Emily Prager Hannah Crafts Zora Neale Hurston David Bradley Peter Heg and Cormac McCarthy Fictions of America provides a bold response to the crucial questions raised by globalisation
