New Deal New South New Deal New South:

New Deal / New South Anthony J. Badger, 2007-06-01 The twelve essays in this book several published here for the first time represent some of Tony Badger's best work in his ongoing examination of how white liberal southern politicians who came to prominence in the New Deal and World War II handled the race issue when it became central to politics in the 1950s and 1960s Franklin Roosevelt in the 1930s thought a new generation of southerners would wrestle Congress back from the conservatives The Supreme Court thought that responsible southern leaders would lead their communities to general school desegregation after the Brown decision John F Kennedy believed that moderate southern leaders would with government support facilitate peaceful racial change Badger's writings demonstrate how all of these hopes were misplaced Badger shows time and time again that moderates did not control southern politics Southern liberal politicians for the most part were paralyzed by their fear that ordinary southerners were all too aroused by the threat of integration and were reluctant to offer a coherent alternative to the conservative strategy of resistance

New Deals Colin Gordon, 1994-07-29 This book an economic history of the interwar era is the first major reinterpretation of the New Deal in thirty years

A Common Thread Beth English, 2010-01-25 With important ramifications for studies relating to industrialization and the impact of globalization

A Common Thread examines the relocation of the New England textile industry to the piedmont South between 1880 and 1959 Through the example of the Massachusetts based Dwight Manufacturing Company the book provides an informative historic reference point to current debates about the continuous relocation of capital to low wage largely unregulated labor markets worldwide In 1896 to confront the effects of increasing state regulations labor militancy and competition from southern mills the Dwight Company became one of the first New England cotton textile companies to open a subsidiary mill in the South Dwight closed its Massachusetts operations completely in 1927 but its southern subsidiary lasted three more decades In 1959 the branch factory Dwight had opened in Alabama became one of the first textile mills in the South to close in the face of post World War II foreign competition Beth English explains why and how New England cotton manufacturing companies pursued relocation to the South as a key strategy for economic survival why and how southern states attracted northern textile capital and how textile mill owners labor unions the state manufacturers associations and reform groups shaped the ongoing movement of cotton mill money machinery and jobs A Common Thread is a case study that helps provide clues and predictors about the processes of attracting and moving industrial capital to developing economies throughout the world

The Postsouthern Sense of Place in Contemporary Fiction Martyn Bone, 2005-06-01 For generations southern novelists and critics have grappled with a concept that is widely seen as a trademark of their literature a strong attachment to geography or a sense of place In the 1930s the Agrarians accorded special meaning to rural life particularly the farm in their definitions of southern identity For them the South seemed an organic and rooted region in contrast to the North where real estate development and urban sprawl evoked a faceless raw capitalism By the end of the twentieth century however

economic and social forces had converged to create a modernized South How have writers responded to this phenomenon Is there still a sense of place in the South or perhaps a distinctly postsouthern sense of place Martyn Bone innovatively draws upon postmodern thinking to consider the various perspectives that southern writers have brought to the concept of place and to look at its fate in a national and global context He begins with a revisionist assessment of the Agrarians who failed in their attempts to turn their proprietary ideal of the small farm into actual policy but whose broader rural aesthetic lived on in the work of neo Agrarian writers including William Faulkner and Eudora Welty By the 1950s adherence to this aesthetic was causing southern writers and critics to lose sight of the social reality of a changing South Bone turns to more recent works that do respond to the impact of capitalist spatial development on the South and on the nation generally including that self declared international city Atlanta Close readings of novels by Robert Penn Warren Walker Percy Richard Ford Anne Rivers Siddons Tom Wolfe and Toni Cade Bambara illuminate evolving ideas about capital land labor and class while introducing southern literary studies into wider debates around social cultural and literary geography Bone concludes his remarkably rich book by considering works of Harry Crews and Barbara Kingsolver that suggest the southern sense of place may be not only post Agrarian or postsouthern but also transnational

Albert Gore, Sr. Anthony J. Badger, 2018-10-02 In chronicling the life and career of Albert Gore Sr historian Anthony J Badger seeks not just to explore the successes and failures of an important political figure who spent more than three decades in the national eye and whose son would become Vice President of the United States but also to explain the dramatic changes in the South that led to national political realignment Born on a small farm in the hills of Tennessee Gore served in Congress from 1938 to 1970 first in the House of Representatives and then in the Senate During that time the United States became a global superpower and the South a two party desegregated region Gore whom Badger describes as a policy oriented liberal saw the federal government as the answer to the South s problems He held a resilient faith according to Badger in the federal government to regulate wages and prices in World War II to further social welfare through the New Deal and the Great Society and to promote economic growth and transform the infrastructure of the South Gore worked to make Tennessee the atomic capital of the nation and to protect the Tennessee Valley Authority while at the same time cosponsoring legislation to create the national highway system He was more cautious in his approach to civil rights though bolder than his moderate Southern peers he struggled to adjust to the shifting political ground of the 1960s His career was defined by his relationship with Lyndon Johnson whose Vietnam policies Gore bitterly opposed The injection of Christian perspectives into the state s politics ultimately distanced Gore s worldview from that of his constituents Altogether Gore s political rise and fall Badger argues illuminates the significance of race religion and class in the creation of the modern South

The Literature of the Ozarks Phillip Douglas Howerton, 2019 This book surveys two centuries of Ozarks literature from an Osage creation story to contemporary poetry and fiction This anthology presents writings from more than forty authors and connects these works to major literary

Roosevelt* presents a collection of historiographical essays by leading scholars that provides a comprehensive review of the scholarship on the president who led the United States through the tumultuous period from the Great Depression to the waning days of World War II Represents a state of the art assessment of current scholarship on FDR the only president elected to four terms of office and the central figure in key events of the first half of the 20th century Covers all aspects of FDR s life and times from his health relationships and Supreme Court packing to New Deal policies institutional issues and international relations Features 35 essays by leading FDR scholars *Race and the Greening of Atlanta* Christopher C. Sellers,2023-08-15 *Race and the Greening of Atlanta* turns an environmental lens on Atlanta s ascent to thriving capital of the Sunbelt over the twentieth century Uniquely wide ranging in scale from the city s variegated neighborhoods up to its place in regional and national political economies this book reinterprets the fall of Jim Crow as a democratization born of two metropolitan movements a well known one for civil rights and a lesser known one on behalf of the environment Arising out of Atlanta s Black and white middle classes respectively both movements owed much to New Deal capitalism s undermining of concentrated wealth and power if not racial segregation in the Jim Crow South Placing these two movements on the same historical page Christopher C Sellers spotlights those environmental inequities ideals and provocations that catalyzed their divergent political projects He then follows the intermittent sometimes vital alliances they struck as civil rights activists tackled poverty as a new environmental state arose and as Black politicians began winning elections Into the 1980s as a wealth concentrating style of capitalism returned to the city and Atlanta became a national poster child for sprawl the seedbeds spread both for a national environmental justice movement and for an influential new style of antistatism Sellers contends that this new conservatism sweeping the South with an antienvironmentalism and budding white nationalism that echoed the region s Jim Crow past once again challenged the democracy Atlantans had achieved **Encyclopedia of U.S. Labor and Working-class History** Eric Arnesen,2007 Publisher Description
