Affairs Robert W. Murray, Paul Gecelovsky, 2021-04-29 This book argues that Canada and its international policies are at a crossroads as US hegemony is increasingly challenged and a new international order is emerging The contributors look at how Canada has been adjusting to this new environment and resetting priorities to meet its international policy objectives in a number of different fields from the alignment of domestic politics along new foreign policies to reshaping its international identity in a post Anglo order its relationship with international organizations such as the UN and NATO place among middle powers management of peace operations and defense role in G7 and G20 climate change and Arctic policy development and relations with the Global South Embracing multilateralism has been and will continue to be key to Canada's repositioning and its ability to maintain its position in this new world order This book takes a comprehensive look at Canada's role in the world and the various political and policy variables that will impact Canada's foreign policy decisions into the future Chapter 22 is available open access under a Creative Commons Attribution 4.0 International License via link.springer.com **The**

History of Physics in Cuba Angelo Baracca, Jürgen Renn, Helge Wendt, 2014-04-22 This book brings together a broad spectrum of authors both from inside and from outside Cuba who describe the development of Cuba's scientific system from the colonial period to the present It is a unique documentation of the self-organizing power of a local scientific community engaged in scientific research on an international level The first part includes several contributions that reconstruct the different stages of the history of physics in Cuba from its beginnings in the late colonial era to the present The second part comprises testimonies of Cuban physicists who offer lively insights from the perspective of the actors themselves The third part presents a series of testimonies by foreign physicists some of whom were directly involved in developing Cuban physics in particular in the development of teaching and research activities in the early years of the Escuela de Física The fourth part of the volume deals with some of the issues surrounding the publishing of scientific research in Cuba Cuba's recent history and current situation are very controversial issues Little is known about the development and status of higher education and scientific research on the island However Cuba has one of the highest proportions in the world of people with a university degree or doctorate and is known for its highly developed medical system This book focuses on a comprehensive overview of the history of the development of one specific scientific discipline physics in Cuba It traces the evolution of an advanced research system in a developing country and shows a striking capacity to link the development of modern research with the concrete needs of the country and its population A little known aspect is the active participation of several western physicists and technicians during the 1960s the role of summer schools organized by French Italian and other western physicists as well as the active collaboration with European universities Subalternity vs. Hegemony, Cuba's Outstanding Achievements in Science and Biotechnology, 1959-2014 Angelo Baracca, Rosella Franconi, 2016-07-12 The present book introduces an original new perspective on Cuba This book revisits Cuba's choice after the 1959 revolution to develop an advanced healthcare and scientific system It also introduces new aspects of the problem development underdevelopment From the

start every effort of the Cuban leadership and scientific community was driven by the primary purpose of meeting the country's basic economic and social needs. Immediate key measures taken after the revolution included free education up to higher levels and free health services. In only a couple of decades, Third World diseases were defeated and a First World health profile was achieved. In the sciences, support and collaboration was sought and welcomed from both Soviet and western countries. Moreover, due to the backward position of the Soviet Union in genetics and molecular biology in the early 1970s, Cuban scientists were trained in these fields mainly by Italian biologists. In the following decade, initially relying on contacts with American and Finnish specialists, Cuban biologists and physicians built a large industrial biotechnology complex to produce and commercialize Cuban-made and often invented medicines and vaccines. In the early 1990s, the sudden collapse of the Soviet Union and the socialist market created an unprecedented challenge. Yet Cuba's scientific system substantially resiled despite unavoidable setbacks. This crisis was faced by confirming and reinforcing government support for biotechnology with the result that today Cuba excels at a global level in the typical capital-intensive field of biotechnology. While this book is especially devoted to historians of science and technology and to biotechnologists, it is of interest to the general public.
